IMPORTANT GOVERNMENT ORDERS.

CHIEF SECRETARIAT.

Reviews the Administration Report of the Mysore Health Department for the year 1929.

READ—

The Administration Report of the Mysore Health Department for the calendar year 1929, received from the Director of Health in Mysore, with his letter No. Per. Y, 15, dated the 22nd—24th July 1930.

ORDER No. G. 4800-27—SANY. 14-30-4, DATED 5TH NOVEMBER 1930.

By the appointment of a whole time Director for the Department of Health with a trained personnel for some of its important sections, a long step was taken during the year towards the creation of an adequate and independent organisation able to give undivided attention to health problems of the State. On the retirement of Mr. B. Mahomed Usmon, Senior Surgeon and Sanitary Commissioner, in February 1929, the combination of these offices ceased and the health services of the State became an independent charge under the control of Mr. J. V. Karve, who was appointed as Sanitary Commissioner, the designation being later on changed to Director of Health. A Board of Health was created to act as an advisory body in health matters. The work of the Department was organised in seven Bureaus named below, but of these the Bureaus of Health Education and of Sanitary Engineering had not been fully organised before the close of the year:—

(1) Bureau of Administration.
(2) " Epidemiology and communicable diseases.
(3) " Laboratories.
(4) Bureau of Vital Statistics.
(5) " Health Education.
(6) " Sanitary Engineering.
(7) " Rural Health.

It is under contemplation of Government to establish other Bureaus such as Maternal and Infant Hygiene, Child Hygiene, Venereal Diseases, Tuberculosis, etc., as staff and funds become available.

Dr. Sweet whose services have been kindly lent to the State by the Intern Health Division of the Rockefeller's Foundation continued to act as Consul Health. Besides supervising personally the working of the Malaria and Rural H Units, he advised Government on the various health problems of the State an particularly helpful in developing the New Health Organisation. One impo branch of this organisation, *viz.*, that of Sanitary Engineering has been recently stituted under the supervision of Mr. Mieldazis, Sanitary Engineer, whose servi have also been generously placed at the disposal of the Government by the Inte national Health Division of the Rockefeller Foundation.

Epidemiology and Communicable Diseases—(*a*) *Malaria*—A new Malaria Experimental Station was started during the year at Hiriyur, in addition to the stations started at Nagenhalli and Mudgere in the previous year. The stations attended to the monthly spleen and blood examination of each community in the area, weekly identification of larvæ and collection of data about rainfall, temperature and vital statistics. Pending a detailed study of the results of the observations taken at these stations, no control work was attempted during the year. Latterly however measures of control have been undertaken at the Nagenhalli Station.

(*b*) *Hookworm Unit.*—In the course of the year, Government sanctioned a scheme for the mass treatment for hookworm of all persons attending Hospitals and Dispensaries in the Shimoga, Kadur and Hassan Districts and parts of Mysore District. The Scheme also provided for the treatment of labourers working on Coffee Estates by Government agency, the cost of the drugs being paid by the Estates. The staff sanctioned for the purpose attended to the treatment of 3,312 villagers in 11 Dispensaries and 6,271 inhabitants of estates or in all a total of 9,583 persons.

(*c*) *Malaria and Health Work in Bangalore City.*—The Officers of the Department co-operated with the Malaria Staff appointed by the City Municipal Council. Government note that there has been a progressive and significant decrease in the spleen rates in the three years from 1927 to 1929. Dr. Natarajan was entrusted with field research studies connected with dysentery and typhoid in the Bangalore City. Steps have also been taken to make enteric and other continuous fevers notifiable in Municipal areas.

BUREAU OF LABORATORIES.

(*a*) *Public Health Institute.*—This Institute continued to attend as usual to Bacteriological, Chemical and Medico-legal Examinations. There was a considerable increase in the number of samples of blood received for Examination. Samples of water both filtered and unfiltered from Bangalore City were received regularly for bacteriological analysis.

Seventy-seven cases of suspected human poisoning were received for Medico-legal opinion. In a large number of these cases, arsenic was found to have been used. The Director points to the need for establishing an effective control over the sale of arsenic and other easily procurable poisons. The attention of the Deputy Commissioners of Districts is invited to the observation made in the Government review of the report of the Public Health Institute for the year 1928 and they are requested, in consultation with the Director of Health to take needful steps in the matter. The Registrar of the High Court is requested to see if arrangements can be made for copies of judgments in cases referred to the Public Health Institute for Examination being furnished to the Superintendent of the Institute so as to enable him to compile a connected history of food poisoning in the State.

(*b*) *Vaccine Institute.*—During the year under review, 366 calves were successfully vaccinated and yielded 43,758 grains of pulp equivalent to 4,37,580 cases. The quantity of vaccine issued was equivalent to 2,64,149 cases including 41,847 cases issued outside the State. The average percentage of successful primary vaccinations was 78 between January to June and 91·5 during the subsequent six months. The average success rate for the whole year was 85 per cent showing an improvement of 5 per cent over the record of the previous year. The income and the expenditure of the Institute was Rs. 23,816-7-11 and Rs. 20,137-8-0 respectively showing an excess of receipts by Rs. 3,678-15-11. The amount outstanding at the close of the year was Rs. 28,976-4-0 of which as much as Rs. 21,738-15-8 related to the previous year's dues from local bodies. The Deputy Commissioners and Presidents of District Boards are requested to adjust these arrears without delay.

VITAL STATISTICS.

A survey of the system of reporting vital statistics and epidemic diseases in the te was conducted by the Bureau of Vital Statistics. The results of this Survey ich have been published in the form of a bulletin, show that in most rural areas d in not a few Municipalities, the reporting of Vital occurrences (particularly hs) is grossly incomplete and that this initial defect is aggravated by carelessness he compiling offices. The attention of the Deputy Commissioners is invited once gain to the instructions issued from time to time to ensure that village patels understand and properly carry out their duties in this respect. The work of compilation in Taluk Offices should also receive greater attention. There is hardly any excuse for the existence of serious defects in the vital statistics of Municipal areas, where a better agency is generally available and the scope for supervision is much greater than in rural parts. The Presidents of Municipal Councils will, it is hoped, take some personal interest in this matter and try to remove the reproach of indifference to health questions that is revealed by the present state of the reporting of vital statistics. Meanwhile the officers of the Health Department could themselves give a useful lead in this direction by arranging for the collection of correct statistics in selected areas, *e.g.*, those coming within the operation of the Malaria and Rural health units and by collaborating more closely with the local authorities in the Cities of Bangalore and Mysore and in the Kolar Gold Field area, where facilities for correct reporting already exist. By these means it will be possible to get reliable statistics for at least a few representative areas, pending improvement in the accuracy of the returns for the State as a whole.

Turning to the statistics as they are now presented, it is seen that the total number of births registered during the year was 1,13,918 against 1,07,355 giving a ratio of 19·44 and 18·46, respectively. The Bangalore District showed the highest rate, *viz.*, 23·24 and the Mysore District the lowest, *viz.*, 15·60. The total number of deaths reported during the year was 83,400 against 91,690 during 1928 giving a ratio of 14·23 and 18·64, respectively. A total number of 10·344 children under one year of age died giving a ratio of 90·80 per 1,000 births. One feature of the year's figures was that the number of births exceeded the number of deaths in all Districts. It is also seen that the death rate among males were higher than that among females in all age periods except in the age groups of 10-15 years and 15-40 years, *i.e.*, the child bearing period for females.

During the year deaths from Plague and Small-pox were noticeably in excess of the numbers reported for the previous year.—

	1929.	1928.
Plague	8,646	3,477
Small-pox	7,589	4,571

A total of 2,24,300 Anti Plague inoculations and 2,03,423 vaccinations were performed during the year. But the incidence of deaths from other diseases such as cholera, fevers and dysentery and diarrhoea was less than in the previous year as detailed below :—

	1929.	1928.
Cholera	140	413
Fevers	33,653	45,123
Dysentery and Diarrhoea ..	2,790	3,628

The Bureau of Health Education.—Gave 102 lectures and demonstrations on Malaria and Hook-worm by means of moving pictures.

In view of growing work of the Mysore Department of Health, it seemed wise to institute the system of distribution of quarterly reports of the work accomplished from January 1st 1929. The Director is of opinion that "these reports will be of benefit in keeping the staff in touch with the work which is being done in the department as a whole, in giving Government more frequent information as to progress and in spreading among the interested people some idea of the scope and character of the health work." As in the previous year, a special sanitation stall was opened in the All-India Exhibition at Mysore and a Gold Medal was awarded to the Department.

The marginally noted bulletins of the Public Health Department were during the year.

Bulletin No.	Name
4.	Guinea-worm disease in the State.
5.	Report of Delegation of the British Social Hygiene Council.
6.	Report of the present Status of Registration of Vital Statistics.
7.	Survey of the State for enlarged spleens, Hook-worm, etc.

BUREAU OF SANITARY ENGINEERIN

Mr. J. J. Mieldazis, B.SC., C.E., Sanita Engineer of the Rockefeller Foun tion arrived from America in Febru 1930 and took charge of this Bureau. Government have since issued orders for transfer of a portion of the Water Supply and Town Planning Division of the Publ Works Department to this Bureau.

BUREAU OF RURAL HEALTH.

The Rural Health Unit at Mandya which was opened in March 1929 imparted advice to the village authorities in health matters, investigated epidemic diseases and attended to vaccination work in addition to starting medical clinics in four centres within their area, one of these clinics at Maddur being for infant and maternal welfare.

Vaccination.—It is seen from the report that the number of vaccinations performed was in excess of the figures for the previous year in all Districts except Mysore. Information has not been furnished about the number of vaccinations conducted among the Adikarnatakas in the Districts of Shimoga, Kadur and Chitaldrug Districts. The Deputy Commissioners of these Districts are requested to furnish to the Director of Health separate figures under this head in their future reports.

Inspections.—The Director of Health visited 33 Urban areas and 51 villages during the year.

General.—An appraisal form based on the American model has been prescribed at the instance of Dr. Sweet for measuring the progress of the health activities in the Cities of Mysore and Bangalore and the Kolar Gold Field Sanitary Board area.

At the invitation of the Government, the League of Nations Malaria Commission visited the State during December 1929 and specially inspected the various places affected with malaria and the three malaria experimental stations. Dr. W. P. Jacocks, the Rockefeller Foundation Representative in Travancore visited Bangalore in April 1929 and kindly assisted in examining specimens of disections done at Hiriyur.

The work of the Department was on the whole satisfactory.

Chief Secretary to Government.

READ—

The Annual Administration Report on the working of the Stores Purchase Committee for the year 1929-30, received with letter No. 4101, dated the 11th September 1930, from the Secretary of the Committee.

ORDER NO. G. 4616-70—G. M. 53-30-3, DATED 3RD NOVEMBER 1930.

Recorded.

2. There was no change in the personnel of the Committee.

3. The Committee met eight times during the year and discussed 65 subjects. In addition to current business, *e.g.*, the scrutiny and passing of tenders, the Committee undertook and made some progress with a systematic examination of the most suitable and economical means of effecting the purchase of stores required for the several Departments. One result of this effort has been that the landing and other incidental charges incurred on consignments coming through Madras harbour have been standardised and to a certain extent reduced.

4. The total value of stores purchased in India and from abroad amounted to Rs. 25,96,320 as against Rs. 33,75,671 during the previous year. Of this, orders to the value of Rs. 9,45,574-5-4 were for foreign articles and of Rs. 16,50,744-14-2 for those made in India. All foreign materials were ordered through the Trade Commissioner for Mysore in London except cables, insulators, tallow, etc., obtained direct from firms in America and Australia which are not represented in England. With the creation of the post of the Trade Commissioner in London, Mr. H. D. Rice, who was previously the Agent in London, was appointed as Assistant to the Trade Commissioner. Purchases of Railway materials were as usual made in consultation with Messrs. Rendel Palmer and Tritton. The policy of giving all possible encouragement to local industries and manufacturers was adhered to and in furtherance of this object, the Committee have under consideration the question of introducing the rupee tender system in the case of all stores purchased for the use of the Government Departments.

5. The Committee investigated the possibility of manufacturing locally some of the drugs, medicines, etc., which are purchased annually for the Medical Department. As a result of this investigation, Germicidal soap and Iodoform, which were hitherto obtained from abroad, have been successfully produced at the Government Soap Factory. It is also proposed to get wooden splints required for Hospital use made from the Central Jail in future.

6. The expenditure on account of the establishment of the Stores Purchase Committee including the commission paid to the Consulting Engineers, Messrs. Rendel, Palmer and Tritton and the fixed contribution of £ 300 towards the cost of the Trade Commissioner's Office in London, amounted to Rs. 37,164 which works out to 1·4 per cent on the total value of the orders placed by the Committee.

7. Government note with pleasure that the work of the Committee continued to be satisfactory.

Sale of the right of Collecting Toll.

READ—

Letter No. C. 467—30-31, dated 23rd August 1930, from the Revenue Commissioner in Mysore, recommending for reasons given that the sales of the right of collecting tolls at the State Fund Toll-gates might, with advantage to the Government and the public alike, be held by the Deputy Commissioner of each District in one central place according to a consolidated programme for the whole State to be issued by him and not separately as at present, and stating that the sales in each District might also be so timed as to afford facilities for the intending bidders to go from District to District and be present at successive sales, and suggesting that a similar procedure might be followed with advantage in respect of the sales of District Fund Toll-gates also.

ORDER NO. R. 2368-79—R. M. 3-30-3, DATED 25TH OCTOBER 1930.

Government are pleased to approve of the procedure proposed by the Revenue Commissioner and to direct that the sales be held at District Headquarters according to a suitable programme.

Letter No. C. 776-30, dated 9th September 1930, from the Director of Agriculture, forwarding the report on the *working of the Amrit Mahal Department for 1929-30, with his remarks thereon.

ORDER No. D. 4552-61—A. M. 2-30-3, DATED 28TH OCTOBER 1930.

Recorded.

Mr. B. Lakshmipathi, the Officiating Amrit Mahal Superintendent was, in addition to his duties, in charge of the Live Stock Section during a portion of the year and of the Cattle Breeding Station at Ajjampur till 6th February 1930, when it was placed under the direct control of the Director of Agriculture.

CONDITION OF THE CATTLE.

The condition of the cattle was generally fair except in parts of Challakere and Tumkur Ranges where they suffered for want of adequate hot weather Kavals. The Director of Agriculture, reports, that it is under contemplation to reduce the number of herds and of cattle with a view to have a really good stock, by keeping only the best animals and disposing of the rest. His proposals in the matter are awaited.

CONTAGIOUS DISEASES.

The total mortality in the several herds on account of contagious diseases amounted to 50 as against 36 during the year preceding. The inoculation of herds against rinderpest which was hitherto being done by the Civil Veterinary Department was taken up this time by the staff of the Serum Institute.

The total amount realised by sale of cattle during the rear under report was Rs. 33,128 as against Rs. 39,215-4-0 in the past year. The decrease is said to be due chiefly to the transfer of young bulls to the Cattle Breeding Station for training and sale for breeding purposes.

The Administration of the Department during the year was on the whole satisfactory.

2. Government Order No. R. 10916-18—Ft. 163-09-16, dated the 27th May 1915, modifying Rule 41A of the Land Revenue Rules regarding the disposal of lands containing sandal trees for cultivation.

4. Government Order No G. 14775-84—Ft. 347-27-8, dated the 11th June 1929, and subsequent orders dated the 1st and 10th August 1929, appointing a Committee to go into the question of modifying the existing rules relating to the responsibility of land-holders for the preservation of sandal trees growing on their lands, the facilities to be afforded to them for the removal of trees which hinder the legitimate use of such lands and the conditions under which lands containing sandal trees might be given out for cultivation.

5. Letter No. G. 5327-28, dated the 5th April 1930, from the Chairman of the above Committee submitting for the orders of Government a unanimous report of the Committee.

ORDER THEREON No. G. 5082-95—FT. 26-29-14, DATED 11TH NOVEMBER 1930.

Sandalwood in Mysore being a monopoly of the State, the question of its propagation and conservancy has always received the earnest consideration of Government and measures have been adopted from time to time to mitigate the hardships felt by private land-holders by the existence of sandal trees on their lands and to afford facilities for a legitimate use of their holdings in spite of the existence of sandal trees thereon. Repeated representations have, however, been made to Government for a modification of the existing rules and orders with a view to removing the difficulties that are said to exist in their practical working. Government therefore appointed a Committee consisting of the following gentlemen about the middle of last year to go into the whole question and submit detailed proposals on the subject :—

(1) Rajakarya Pravina Mr. P. G. D'Souza, B.A., B.L., Revenue Commissioner in Mysore (Chairman).
(2) Mr. B. V. Ramaiengar, B.A., Chief Conservator of Forests in Mysore.
(3) Mr. M. Machaiya, B.A., Conservator of Forests, Shimoga Circle.
(4) Mr. K. V. Anantaraman, B.A., Deputy Commissioner, Mysore District.
(5) Mr. H. V. Ramaswami, M.A., B.L., Deputy Commissioner, Kadur District.
(6) Mr. M. N. Balaraj Urs, B.A., Deputy Commissioner, Shimoga District.
(7) S. L. Mannaji Rao Kadam, Member of the Mysore Legislative Council.
(8) Mr. F. M. Abdul Khuddus, Member of the Mysore Representative Assembly.
(9) Mr. L. P. Mascarenhas, Technical Assistant to the Chief Conservator of Forests in Mysore (Secretary.)

2. The Committee considered it desirable for a proper threshing out of the various questions referred to them for enquiry to invite leading representatives from each District to lay before them the practical difficulties experienced in the working of the existing rules and orders and to suggest remedies for their removal. They accordingly selected in consultation with the Deputy Commissioners and with the approval of Government 13 gentlemen representing various interests and after discussing the questions thoroughly with them, have submitted an exhaustive report which is printed as an annexure to this order.

3. Before passing orders on the various recommendations of the Committee, Government wish to place on record their appreciation of the thorough manner in which the Committee have dealt with the questions referred to them for investigation and to convey their thanks to all the members as well as the non-official representatives who assisted in the deliberations of the Committee.

4. *Damage to Sandal Trees.*—According to Section 73 of the Mysore Forest Regulation, every occupant or holder of land is held responsible for the due preservation of all sandal trees growing thereon. He is also liable to pay compensation on account of damage caused to such trees in case he fails to report such damage and to prove that it was not caused by his own act or by neglect on his part. As this Rule is said to be working as a hardship, the Committee recommend that the person in actual possession, *i.e.*, the Anubhavadar of the land should be made primarily responsible for the damage caused to sandal trees on his land and that the Khatedar or registered occupant should be made liable for it only in case the amount of damage becomes irrecoverable from the Anubhavadar. They also recommend that the word "damage" should be so defined as to bring lopping of branches resulting in material injury to the trees under the category of damage and that the holder of the land containing such trees should be made liable to pay one-fourth or half or the full penalty prescribed according to the extent of damage done. Government consider that the reasons urged by the Committee for a change in the existing law in this behalf are sound and accordingly direct that necessary further action be taken for the amendment of Section 73 of the Forest Regulation on the lines indicated.

5. *Bonus for Sandal Trees.*—The rates of bonus now fixed for sandal trees grown in private holdings are as follows:—

Class	Girth of trees at 4 ft. above ground level	Bonus Payable		
		Rs.	a.	p.
I	Below 12 inches	0	8	0
II	12 to 21 inches	1	8	0
III	21 to 30 inches	4	8	0
IV	30 to 36 inches	7	8	0
V	Above 36 inches	10	0	0

NOTE—A mature tree is one which is showing signs of decay. This is indicated by the following symptoms:—

(*a*) dead main branches and leading shoots,

(*b*) decay of bark, and

(*c*) pale colour and diminutive size of the leaves.

A further and infallible test is that the heart-wood must not be at a lower depth than one inch from the surface.

The Committee consider that these rates are low under present conditions and they recommend that they might be increased to thrice the present scale. But they do not propose any change in the present scale of fees for damage caused to sandal trees growing in private holdings. Government consider that, if an increase in the scale is justified in the one case, it should be equally justified in the other. Having regard to the interests of Government revenue and with a view to enlist the co-operation of the raiyat in the growth and preservation of sandal trees on his land, Government direct that the scale of fees payable now in force be doubled both in the case of bonus as well in the case of damage caused.

6. *Prompt payment of bonus.*—With a view to obviate the delay that is now occurring in the Range Offices in the disposal of applications for the removal of mature sandal trees from private holdings, the Committee recommend that an occupant might be permitted to uproot and rough-dress the trees in his land provided they have been previously stamped by the Range Officer and that the payment of bonus should be made by the Range Officer immediately he receives the wood. They also recommend that the Range Officer should be required to pay the rates in vogue for collection and carting to the party who brings the sandalwood, these rates being fixed on the basis of girth and distance. These recommendations are approved.

7. *Compensation for removal of green trees.*—The Committee recommend that, as the wood which is ordinarily got from a tree of lesser girth than 12 inches is not considerable, the occupants may be exempted from paying any compensation for the removal of such green trees when they interfere with the legitimate use of the land. This proposal is approved.

8. *Grant of lands containing Sandal Trees.*—The grant of lands containing sandal trees for cultivation is now regulated by the provisions contained in Rule 41A of the Mysore Land Revenue Rules. According to this Rule, it is not permissible to grant for cultivation lands containing a rich growth of sandal trees; but what constitutes a rich growth has not been defined. The existing Rule also permits the grant of lands containing sandal trees without the recovery of the present value of the bonus which may eventually become payable to the occupant. The Committee consider it desirable to define what is meant by rich growth in such cases and to do away with the option given to the dharkhastdar to take the land for cultivation without paying the present value of the bonus. They accordingly suggest the following modifications in the existing Rule:—

(1) When any land contains 10 or more sandal trees of over 12 inches girth per acre, it should be considered as having a rich growth of such trees and such land should be reserved and not granted for cultivation.

(2) Lands containing a lesser number of trees than that prescribed above and those containing a sprinkling of green plants may be given out for cultivation, provided that the levy of malki should be made compulsory in all cases and the present system of granting land without recovering the malki should be discontinued. Government approve of the above suggestions. The Revenue Commissioner is requested to take action for getting the Land Revenue Rules amended accordingly.

SANDAL PLANTATIONS.

9. According to the present rule, raiyats raising sandal plantations in maidan Taluks are entitled to 50 per cent of the net value of mature trees removed from such plantations, while the raiyats of malnad taluks are allowed only 25 per cent of the net value. The Committee recommend that a uniform rate of 50 per cent of the net value of trees removed might be given as bonus in both maidan and malnad parts of the State. They also suggest that a plantation should mean an area not less 5 acres in extent on which sandal is the principal crop and which contains not less than 20 trees per acre and that the concessions should be given also to lands already in occupation in which the above conditions are satisfied. Government approve of these recommendations and also direct that wide publicity be given to the modified rules on the subject.

PROMPT DISPOSAL OF SANDAL DAMAGE CASES.

10. In the concluding portion of their report, the Committee deal with the desirability of arranging for the prompt disposal of sandal damage cases. They suggest—

(1) that as soon as any damage caused to sandal trees comes to the notice of the Range Officer, he should arrange for the service of a notice on the land-holder so that the latter may have an opportunity to prove his innocence;

(2) that the Range Officer should submit the records within a week to the District Forest Officer for transmission to the Amildar with his views; and

(3) that the Amildar should pass final orders and cause the recovery of the compensation amount within 2 months of the date of receipt of records.

These proposals are approved.

REMUNERATION TO VILLAGE OFFICERS.

11. The Committee recommend that, as an incentive for the proper watch and ward of sandal trees growing on lands within their jurisdiction, the Patel and the Shanbhog should be given a remuneration equal to 5 per cent of the bonus paid to the owner for every tree removed from the village limits and that they should be required to report to the Range Officer full particulars of any dry sandal tree fit for extraction within their jurisdiction. These proposals are approved.

12. The other recommendations of the Committee not specifically dealt with above are also approved.

R. RANGA RAO,
General Secretary to Government.

REPORT OF THE SANDALWOOD COMMITTEE.

INTRODUCTORY.

Under Section 72 of the Forest Regulation, sandal trees are the exclusive property of Government, wherever they may be grown whether in Government land or private land. As a safeguard against the destruction of such trees in private land, Section 73 prescribes certain penalties to which an owner of land on which sandal trees grow is liable, in case any damage is caused to such trees, unless he can prove that the injury or damage was not due to his act or negligence. In 1909, the Government laid down a policy of giving the raiyats a share in the revenue from sandal trees on their holdings and affording facilities for the removal of such of them as were a hindrance to the proper user of the land. With a view to discouraging the removal of immature trees from occupied lands, a scale of fees was fixed for payment to Government as compensation for the trees required to be removed. Representations were frequently made by the public that the rules have been pressing very hard on the agriculturists and do not afford sufficient incentive for the preservation of the trees on account of the low amount of bonus to which the owner of the land is entitled as compared to the value derived by Government therefrom and that they may be modified. In view of these representations, certain modifications were made, having in view the interests of Government and of the raiyat. But finding that all the difficulties experienced by the raiyats have not been removed and that there have been renewed representations in this behalf, Government in their Order No. G. 14775-84—Ft. 347-27-8, dated 11th June 1929, appointed a Committee to go into the whole question pertaining to sandal trees on occupied lands and on lands to be given out for cultivation, and submit their proposals in this behalf.

2. PERSONNEL OF THE COMMITTEE.

The Committee as originally constituted consisted of the following members:—

1. The Revenue Commissioner in Mysore (Chairman).
2. The Chief Conservator of Forests.
3. The Deputy Commissioner, Mysore District.

5. Mr. S. L. Mannaji Rao Kadom, Member, Legislative Council.
6. Mr. F. M. Abdul Quddus, Member, Representative Assembly, with the Technical Assistant to the Chief Conservator of Forests as Secretary to the Committee.

After the first meeting of the Committee, it was resolved to invite the Conservator of Forests, Shimoga Circle, to be present at the subsequent meetings, and this was approved by Government in their Order No. G. 1391-401—Ft. 26-29-2, dated 1st August 1929. Later, on a reference from the Chief Conservator of Forests, the Deputy Commissioner of Shimoga was added to the Committee in G. O. No. G. 1980-90—Ft. 347-27-2, dated 10th August 1929.

3. Terms of reference to the Committee:—

They are:—

(*a*) (1) Whether the occupant or holder may be relieved to any extent of the responsibility for damage to sandal trees in his land;

(2) if he is relieved of the responsibility, what measures should be adopted for the proper preservation of the trees;

(3) if the continuance of the present rules is necessary, what further reliefs, any, may be given to him; and whether it is not necessary to raise the scale of fees for damage to the trees having regard to the increased value of sandalwood;

(4) whether the rates of bonus now granted require any revision;

(5) whether the procedure for the payment of bonus requires any change to ensure that the amount is received promptly by the person entitled to it.

(*b*) whether any compensation should be recovered from the occupant for the removal of 'Green' sandal trees from his occupancy at his request

(c) Whether malki should be recovered from the raiyat on trees standing on the nd given out to him for cultivation.

(d) Whether the malki recovered from the occupant should be refunded to him en he resigns the land leaving the trees in tact.

(e) Whether the concessions granted in the Government Order of 1919 are sufficient encourage the raising of sandal plantations; if not, what further concessions are cessary for popularising the rearing of such plantations.

(f) Whether it is desirable to prepare lists of lands suitable for cultivation of sandalwood with a view to their reservation or to their being given out for growing sandal on special terms.

(g) In what respects the rules regarding grant of lands containing sandal trees require revision, so as to meet the reasonable demand of the people for lands for cultivation without affecting Government interests in sandal trees.

(h) What safeguards should be provided for the prevention or the removal or destruction of sandal saplings growing on occupied lands.

(i) Whether the existing provisions of the Regulation (Sections 74, 54 and 55 thereof) are sufficiently deterrent in case of offences relating to sandal, and if not, what amendment of law is necessary.

SYNOPSIS OF WORK DONE BY THE COMMITTEE.

The Committee held in all four meetings. In the first meeting held in the Chief Conservator's Office on 9th July 1929, there was a general discussion as regards the various questions referred to the Committee for report and it was finally resolved that a Conference be held with the leading representatives from the Districts in order to obtain their views on the subject and that the Deputy Commissioners be requested to select such representatives. In pursuance of this resolution, the following members were invited to be present at the next meeting held on the 14th October 1929 in Mysore:—

This meeting was specially fixed during the Dasara Festival with a view to facilitate the attendance of all the invited representatives. But some of them were not present at the meeting and those that attended the meeting represented that they were not sufficiently conversant with the literature on the subject and that they might be supplied with complete information and another meeting arranged, so that they might study the question with reference to the existing rules, consult local opinion, and voice their views in the next meeting. A general discussion took place on that date and the next meeting was fixed at Bangalore. To enable them to study the rules on the subject at present, a copy of the Forest Manual was supplied to each of the Representatives.

The meeting in Bangalore was held on the 4th November 1929 when the views of the several Representatives were heard and discussed.

Copies of the Proceedings of the two meetings with the non-official District Representatives are enclosed and are marked A and B.

The final meeting of the Committee was held on the 7th December 1929 in the Revenue Commissioner's Office wherein the recommendations to be made to Government were agreed upon.

We shall now deal with the terms of reference one by one.

(a) (i) Whether the occupant or holder can be relieved to any extent of the responsibility for damage to sandal trees on his land.

(ii) If he is relieved of the responsibility, what measures should be adopted for the proper preservation of the trees.

(iii) If the continuance of the present rule is necessary, what further relief if any may be given to him; and whether it is necessary to raise the scale of fees for damage to the trees having regard to the increased value of sandalwood.

(iv) Whether the rates of bonus now granted require any revision.

(v) Whether the procedure for the payment of bonus requires any change to ensure that the amount is received promptly by the person to it.

As regards (a) (i) and (a) (ii) and (iii) the District Representatives urged in the first instance that this liability should be entirely removed and that only the persons actually proved guilty of having committed mischief or damage should be made liable. When it was pointed out to them that sandalwood was the property of the State and that any relaxation in the responsibility of the land-holders would result in the wholesale destruction of sandal trees on private land and the consequent loss to Government without any chance of detection and without fear on the part of the occupant or person in possession thereof, it was admitted that such vicarious responsibility could not be [illegible]ved altogether, but they wanted the following modification:—

"that the person in actual possession (*i. e.*, Anubhavadar) of the land should be [illegible]de primarily responsible for the damage that occurred to sandal trees in his land and [illegible] in case the cost of the damage becomes irrecoverable from him, then alone should [illegible]e registered occupant be made liable for it." The Members of the Committee have accepted this suggestion and it was resolved that a recommendation may be made to Government to amend the law and rules in this behalf accordingly. In view of the above resolution, the present scale of fees for damage to sandal trees which is fixed sufficiently high, was considered to require no revision.

Touching (a) (iv), the non-official members made various proposals urging increase in the rates of bonus now granted. They urged that the present rates are disproportionately low compared to the net value that Government realises by taking the trees grown in private holdings and that at least 50 per cent if not more of the net value of scented wood at the rate prevailing at the time for sandalwood, should be given to the land-holder as bonus. Other suggestions on similar lines but varying the proportion were made by the Representatives. It was pointed to them that it would be impracticable to fix the bonus according to the value of the scented wood that could be got from each tree, as such a determination is beset with practical difficulties.

On the whole, there was general agreement that it was more advantageous to the people to follow a simple rule of thumb method by which bonus to be granted for each tree could be readily fixed and paid on the spot and that the rates now prevailing are low having been fixed a long time ago.

It was resolved that as the price of sandalwood had increased during the past few years, the rates of bonus may be increased to thrice the present scale of rates and that the bonus should be calculated on the girth of the tree removed.

As regards (a) (v), *viz.*, procedure for the payment of bonus, a suggestion was made that the payment should be made immediately a tree grows to maturity in a particular field. Another suggestion was that as it was not fair to the owner of the land to ask him to wait indefinitely until the Forest Department decided that the tree had become mature and removed it, a certain number of years should be fixed as the period by which a tree, even when alive, was to be considered to have matured and payment of bonus should be made antomatically thereafter. A third suggestion was that as soon as a tree is up-rooted, the payment of the bonus should be made on the spot. These and other suggestions as contained in the summary of discussions were considered by the Committee and it was finally resolved by them that the occupant may be permitted to uproot and rough dress the tree in his land, provided it is previously stamped by the Range Officer and wood is transported under a passport to the Headquarters of the Range Officer and that the payment of the bonus should be made by the Range Officer immediately he receives the wood. He should also pay the rates in vogue for collection and carting to the party who brings the sandalwood. These rates may be fixed on the basis of girth and distance.

(b) Whether any compensation should be recovered from the occupant for the removal of "Green" sandal trees from his occupancy at his request.

The trend of the representation on this point was that there should be no levy in the shape of compensation to be recovered from the occupant for the removal of green sandal trees in his occupancy which are a source of hindrance to the proper cultivation of the land. After considering various aspects of the case placed before them, the Committee came to the conclusion that as the wood that is ordinarily got from a tree of less girth than 12 inches is not considerable, the occupants may be exempted from paying any compensation for the removal of such green trees which under Rule 8 are found to interfere with the legitimate use of the land. As for trees of bigger girth, since the loss to Government by the premature removal is rather great and the present rates are not unreasonable, they may be continued without any alteration.

As regards (c) whether malki should be recovered from the raiyat on trees standing on the land given out to him for cultivation, (d) whether the malki recovered from the occupant should be refunded to him when he resigns the land leaving the trees in tact, and (g) in what respects the rules regarding grant of lands containing sandal trees require revision so as to meet the reasonable demand of the people for lands for cultivation without affecting Government interests in sandal trees.

After considering the views of the Non-official Members the Committee resolved that the following changes may be introduced in the rules relating to the same.

(1) Lands containing rich growth of sandal trees should not be granted for cultivation. When any land contains 10 or more sandal trees of over 12 inches girth per acre, it should be considered as fit for reservation.

(2) Lands containing fewer trees than above and those containing a sprinkling of green plants may be given out for cultivation on payment of the present value of the bonus that would be payable to the occupant in case the trees had grown to maturity.

This rule of levying a malki should be made compulsory and the present system of granting land reserving the sandal trees standing on it without recovering the malki should be discontinued as it is not possible to verify the terms of each grant of land after the lapse of several years when it is just possible that bonus will be claimed and paid even in the case of trees which had been specially reserved to Government at the time of the grant.

It was suggested that when land containing sandal trees is resigned by an occupant, an amount equivalent to the bonus on the sandal trees that are standing on the land so resigned calculated in the same manner as compensation that would be recovered from a person who would apply for that land at that time as per rule (1) *supra* should be paid to the occupant. The Committee consider this suggestion not practicable. Moreover it involves a new principle in regard to absolute relinquishments.

With the above modifications in the present set of rules *re* the grant of land containing sandal trees, the reasonable demand of people for cultivation will, it is hoped, be satisfied without affecting the interests of Government in the sandal trees.

(e) *Whether the concessions granted in the Government Order of 1919, are sufficient to encourage the raising of sandal plantations; if not, what further concessions are necessary for popularising the rearing of such plantations.*

A distinction is made in the present rules between Malnad and Maidan parts of the State in regard to the concessions to be given to private persons for growing sandal trees in Government (unoccupied) land. The present rule is that while raiyats raising plantations in Maidan Taluks are entitled to 50 per cent of the net value of mature trees removed from such plantations, the raiyats of Malnad Taluks are allowed only 25 per cent of the net value. The non-official members urge that this distinction between Maidan and Malnad parts should be removed and that a uniform rate of 50 per cent of the net value of trees removed should be given as bonus in all the parts of the State and that as these rules are not understood generally by the people at large, special efforts should be made by the Revenue and Forest Departments to publish these rules broadcast. The Committee agreed to these proposals. They consider however that a plantation should mean an area not less than 5 acres in extent on which sandal is the principal crop and containing not less than20 trees per acre and that the concessions should be given also to lands already in occupation in which the above conditions are satisfied.

(f) *Whether it is desirable to prepare lists of lands suitable for cultivation of sandalwood with a view to their reservation or to their being given out for growing sandal on special terms.*

As regards (f), it was suggested that lists of lands suitable for cultivation of sandalwood should be prepared by the Revenue and Forest Departments with a view to their reservation or being given out for private persons for growing Sandal trees. But, after discussion, the Committee came to the conclusion that the preparation of such lists was not a practical proposition and that whenever any person came forward with an application, every facility should be given to him.

(h) *What safeguards should be provided for the prevention of the removal or destruction of Sandal saplings growing on occupied lands.*

With the liberalising of the rules regarding the payment of compensation to registered occupants for trees obstructing cultivation in the land, the Committee came to the conclusion that no further safeguards need be provided against the destruction of Sandal saplings, growing thereon.

(i) *Whether the existing provisions of the Regulation (Section 74 and Sections 54 and 55 thereof) are sufficiently deterrent in case of offences relating to Sandal and if not what amendment of law is necessary.*

While on this subject, it has to be observed that the word 'damage' to a Sandal tree is not defined in all its aspects but is understood in a general sense so as to include the total destruction of a tree as well as the removal of a small branch for the purpose of using the leaves thereof, which has not the effect of materially injuring it and the penalty prescribed in both the cases is one and the same. The Departmental Officers have no other alternative than to follow the Standing Orders on the subject.

Some of the members represented that the mere removal of a few small branches for the sake of the leaves should not be treated as damage and dealt with as if the whole tree was destroyed.

The Chief Conservator reiterated that the word 'damage' to sandal tree should be clearly defined and that removal of branches for goat browsing, which may not kill the tree, but which sufficiently hinders its healthy growth is not at present considered to be damage and that unless this action is also included in the word 'damage' and the authors (culprits) thereof are suitably punished, there is every possibility of a setback being caused in the healthy growth of the tree and consequently considerable loss to Government. This was accepted by all the members of the Committee and it was resolved that the rule should be so amended as to bring lopping of branches resulting in material injury to the trees under the category of damage and making the holder of the land containing such trees liable to pay one-fourth or half or full penalty prescribed according to the extent of damage done.

When the Range Officer receives a report from the Patel or comes to know through any other source of any damage caused to sandal trees and conducts and closes his investigation as to the damage caused to such trees he should serve a notice on the land-holders through the Patel noting therein the amount assessed so that the land-holder may be in a position to know the nature of the complaint against him and take steps to prove his innocence. The Range Officer will within a week submit the full records of the case to the District Forest Officer who in turn will enter the same in the prescribed sandal damage register and forward the same to the Amildar with his own views; the Amildar

ould pass his final orders and cause the recovery of the amount within two months of e date of the receipt of the records, send the Treasury challan to the Range Officer for corporating in his accounts and the records to the District Forest Officer. It should o be made a Standing Order that it is one of the duties of the Village Patel and anbhogue to see that sandal trees in occupied lands are properly protected by the owner person immediately in possession of land, and to report as soon as information is ceived by him of any damage done to sandal trees in the village. As an incentive to the lage servants to do their function of watch and ward properly, the Committee resolved that the Village Officers, *viz.*, (the Patel and the Shanbhogue) should be given a remuneration of 5 per cent each on the bonus paid to the owner for every tree removed from the village limits. In view of this remuneration, it should be made their duty to report to the Range Officer full particulars of any dry sandal tree fit for extraction within their jurisdiction.

The above precautions are necessary to ensure proper preservation of sandal trees.

The existing provisions for punishing offences against sandal trees are in the opinion of the Committee sufficiently deterrent and need no alteration.

The Committee desire to express their acknowledgments to Mr. L. P. Mascarenhas, Secretary to the Committee, and Mr. R. A. Narasimha Iyengar, the Second Assistant to the Revenue Commissioner for collecting the materials required for the report and the help they rendered in its preparation.

B. VASUDEVA RAO,
Head Master and Secretary.

OFFICE OF THE REVENUE COMMISSIONER IN MYSORE, BANGALORE.

Circular No. R. Dis. 27—30-31, *dated 6th November* 1930.

As many tanks are rapidly getting silted up, it is necessary that suitable steps should be promptly taken to prevent further damage. The most effective of such measures is said to be the planting of a belt of honge trees in the contour of tanks. If 4 to 6 rows of such trees are planted in a zig-zag manner so as to check the flow of silt without hindrance to the inflow of water, the tanks are likely to be protected to a material extent from further damage.

2. In Government Order No. 2615-22—F. 282, dated 2nd August 1880 (*vide* Article 384 of the Revenue Manual), general instructions have been issued in this matter. But, much progress does not appear to have been so far made and it is not likely to be made unless continuous attention is paid to the work in a systematic manner according to a programme, till the desired result is achieved. A definite number of tanks should first be selected for this treatment. The area of planting should be marked out.

3. It is desirable to interest the Village Panchayet in the work as it would not be proper to create any individual right therein. The Village Panchayets may perhaps be authorised to incur a small expenditure for the purpose. They may be permitted to utilise the income therefrom. The Deputy Commissioners are requested to give their best consideration to this very important subject, select a fair number of tanks in each Taluk for the purpose and advice the Village Panchayets concerned to take suitable action on a well-defined programme. The progress of work under this head should be carefully watched and a report on the progress achieved should be sent up at the end of June 1931.

S. P. RAJAGOPALACHARI,
Revenue Commissioner.

The fracture shall be between the bench marks and not closer than 1" to either mark. If upon testing a sample from any coil of wire, the results are found to be below the values stated in the table, tests upon two additional samples shall be made and the average of the three tests shall determine the acceptance or rejection of the coil.

(b) *Lapping Test.*—The test samples shall be closely lapped six times round a wire of its own diameter, unlapped and again closely lapped six times round the wire of its own diameter in the same direction as the first lapping without breaking.

IMPORTANT GOVERNMENT ORDERS.

CHIEF SECRETARIAT.

Re-arranging the contents of the Mysore Gazette."

ORDER No. G. 5139-95—P. & S. 52-30-1, DATED 12TH NOVEMBER 1930.

The question of re-arranging the contents of the *Mysore Gazette* has been under the consideration of Government for some time past. A Committee constituted in June 1926 consisting of the marginally noted gentlemen to go into this and other cognate matters relating to the publicity arrangements of Government have recommended that the *Mysore Gazette* may continue to be published in six parts as heretofore but that the contents of Parts I to IV may be re-arranged as follows:—

1. The Chief Secretary to Government.
2. The Publicity Officer to Government.
3. Mr. B. Puttaiya, Superintendent, Government Printing.
4. Mr. D. V. Gundappa.

Part I should contain all important Government Orders, including reports of Committee and other documents of public interest, which the Government desire to publish for general information.

Part II should include only Notifications regarding appointments, postings, leave, etc.

Part III should comprise three sections, (i) containing Notifications by Government at present included under Section (ii) of Part II, (ii), Notifications by Heads of Departments, and (iii) Notifications relating to Local Self-Government.

Part IV should be set apart for Legislative Measures and Rules thereunder.

The Committee are also of opinion that the publication in the Gazette of Municipal Bye-laws, Proceedings of District Boards, Municipalities, etc., should be discontinued.

This proposal is endorsed by the Committee on Government Printing and Stationery who have also suggested that departmental advertisements should be as short as possible and that trivial items, *e.g.*, notices calling for tenders involving small amounts need not be printed in the Gazette.

Government are pleased to approve of the above recommendations.

N. MADHAVA RAO,
Chief Secretary to Government.

DEVELOPMENT SECRETARIAT.

The working of the Department of Mines and Explosives.

READ—

Correspondence ending with letter No. 457, dated 20th September 1930, from the Chief Inspector of Mines, submitting the Administration Report of the Department of Mines and Explosives for the year 1929-30.

ORDER No. D. 5051-62—GEOL. 31-30-6, DATED 8TH NOVEMBER 1930.

Recorded.

2. *Personnel.*—Mr. R. Bocquet, continued as Chief Inspector of Mines, during the year. Mr. C. E. Suryanarayana Rao, Inspector of Mines, was deputed to South Africa for a period of about six months to attend the Third Session of the Empire Mining and Metallurgical Congress held there in March 1930. Besides attending the Congress, Mr. Suryanarayana Rao availed himself of the opportunity to make a special study of modern mining practice, the law and system of Mines inspection obtaining in the Transvaal Mines, occupational diseases incidental to gold mining, etc. Mr. K. Duraiswamier, acted as Inspector of Mines during the period.

Mr. V. Ganesha Iyer. Works Manager of the Mysore Iron Works at Bhadravati, was appointed an Inspector of Mines in respect of the mines operated by the Mysore Iron Works, and the Chief Inspector of Mines was appointed *ex-officio* Inspector of Boilers for the Kolar Gold Field Mining area.

3. *Mining and Prospecting.*—The following statement shows the number of leases, licenses and certificates of approval that were current during the year as compared with those of the previous year:—

	1928-29.	1929-30.
Mining Leases	44	43
Prospecting Licenses ...	15	15
Collecting Licenses ..	3	3
Exploring do ..	4	Nil
Certificates of approval ..	34	21
Total ..	100	82

The number of mining leases for gold was the same as during the previous year, *viz.*, 21.

4. *Gold Mining Operations.*—As in the previous year, five Companies carried on gold mining operations, all of them being in the Kolar Gold Field area. The total quantities of fine gold and silver produced during the calendar year 1929 were approximately 363,741 ozs. and 17,810 ozs. respectively as against 375,886 ozs. and 21,082 ozs. during the previous year. The total value of both fine gold and silver produced amounted to £ 1,549,729 as against £ 1,606,638 during the previous year showing a decrease of £ 56,909 due to reduced production. All the gold produced except some small quantities realised from Cyanide slags, etc., was sold in India at favourable rates compared with the market quotations in London. The total amount paid in dividends showed a decrease of £ 36,908, being £ 270,545 as against £ 307,453 in the previous year, and worked out to 16·22 per cent on the paid up capital as against 18·44 per cent in 1928. There was a decrease of £ 3,480 in the royalty payable to Government owing to diminished production, the amount being £ 83,955 against £ 87,435 in 1928. Calculated in terms of Indian currency, the total demand on account of royalty payable on gold and silver, including the balance due for previous years, amounted to Rs. 14,93,638 out of which a some of Rs. 12,28,658 was collected leaving a balance of Rs. 2,64,981.

From 1882 to the end of 1929, the total quantity of fine gold produced was 16,263,020 ozs. of the aggregate value of £70,329,290. The total dividends paid amounted to £ 22,122,263 and the royalty realised was £ 3,710,145.

5. *Position of the Mines.*—Owing to the increasing depths of the mines, the ...ing costs are also said to be increasing gradually year by year and large sums of ...ey are being spent on maintaining adequate ventilation at all the lower working ...ces. Trained crews are maintained for prompt action in case of fires and a "Safety ...st" campaign is also carried on.

The estimated ore reserves of all the mines amounted to 1,387,501 tons at the end of the year 1929, or a decrease of 67,200 tons as compared with the figure for 1928.

6. *Other Minerals.*—The following statement shows the output, etc., of the minerals other than gold worked during the year.

Minerals	Quantity extracted	Quantity exported or sold	Royalty payable for the year
	Tons	Tons	Rs. a. p.
1. Manganese ..	44,150	32,290 (Includes ore from previous year's stock).	11,767 12 0
2. Chrome ..	27,048	17,204	16,096 9 10
3. Magnesite ..	1,276	.....	1,760 0 0 (dead rent)
4. Kaolin ...	3,273	3,273	2,628 0 0
5. Soapstone ..	106	105	150 0 0
6. Iron Ore ..	50,017	43,009	(Utilised by the Mysore Iron Works.)
7. Limestone ...	2,205	1,739	

7. *Inspections.*—The inspection of the mines on the Kolar Gold Field was systematic and regular. No serious defects or breaches of the mining rules were noticed. On the other hand, it is reported that considerable attention is being paid to the safety of workmen, regardless of cost.

Enquiries into all fatal and serious accidents were held and prosecutions for breaches of the mining rules were successfully launched except in one case in which the accused is absconding. Some mines outside the Kolar Gold Field were also inspected during the year in the Mysore and Kolar Districts, but no serious defects were noticed. One serious accident is reported to have occurred outside the Kolar Gold Field in the Tallur Chrome Mines, Mysore District, in which a stuff cooly lost his life by falling from a ladder. The books and accounts of the Mysore Gold Mining Company were inspected by the Comptroller in February 1930 in association with the Chief Inspector of Mines and with the help of the Company's Auditor. Government wish to convey their thanks to the Officers and staff of the Company for their co-operation in conducting the examination of the accounts.

Government have under their consideration the set of special rules applicable to small mines worked on the open-cast system submitted by the Chief Inspector, as also the draft revised rules for the grant of mining leases and prospecting licenses framed by him in consultation with the Director of Geology.

8. *Mining Labour.*—During the year 1929, 20,534 persons were employed in the mining industry as against 20,961 in 1928 showing a decrease of 427. Of the 18,454 persons employed in Gold Mining, 330 were Europeans, 379 Anglo-Indians and 17,745 Indians. The harmonious relationship hitherto existing between the employers and the employed was disturbed by the outbreak of an unprecedented strike in April 1930 lasting for a period of over 20 days in which the labourers of all the five mines, numbering about 16,000, took part. The cause of the strike was a misapprehension on the part of the workmen as to the real purpose of the Labour Registry Office which had been newly opened. They were easily led into believing that the object of this innovation was to obtain some unfair advantage over them. After fruitless attempts to come to a compromise with the strikers, the Mining Authorities, on the advice of the Dewan, finally agreed to withdraw the new rules and thus brought the strike to an end on the 28th April 1930. A remarkable feature of the strike was the absence of any damage to property in general. As a result of this incident, Government deputed a Special Officer to enquire into the conditions of labour on the Field and suggest ameliorative measures. The report of the Officer is under the consideration of Government.

9. *Accidents.*—The total number of accidents reported during the year was against 194 in the previous year. Of these, 49 were fatal, 181 serious, 1 trivial 3 non-mining. 83·91 per cent of the fatal and serious accidents were classed as avoidable and the mortality was 3·55 per 1,000 persons employed against 2·05 dur the previous year. In the case of rock bursts to which a large proportion of the fa accidents is due, the present Chief Inspector (Mr. C. E. Suryanarayana Rao) repor that they continue to occur in spite of improved forms of supports, but that their disastrous effects are being gradually reduced and restricted to certain narrow zones of heavy ground. Mr. Suryanarayana Rao who has examined the system of supports obtaining in the South African Mines, during his recent visit there, is of opinion that in conformity with local conditions, the system adopted on the Kolar Gold Field is the best that could be thought of at present. Government have directed that special attention should be paid to these accidents so as to minimise the loss of life.

10. *Compensation for injuries.*—A total sum of Rs. 38,518-8-0 was deposited by the Mining Companies under the Workmen's Compensation Act, as against Rs. 20,715 during the preceding half-year ending 30th June 1929, out of which a sum of Rs. 35,276 was paid to the claimants.

11. *Prosecutions.*—Seventy-nine persons involved in 66 cases were prosecuted in connection with thefts and illegal possession of mining materials, of whom 59 were convicted, showing a decrease when compared with last year's figures. Twenty-eight persons were convicted for breach of rules, causing accidents, etc., as against 17 in 1928.

12. *Explosives.*—During the year (1929), 794 licenses were granted under the Mysore Explosives Rules as against 804 in the previous year, resulting in a decrease of 10. The departmental inspection of magazines and their premises was satisfactory. Eight reports of inspection of Government magazines in charge of Civil Officers which were received in the Chief Inspector's Office were scrutinised and the irregularities or defects requiring to be remedied were brought to the notice of the officers concerned. The number of inspections of licensed premises carried out by the Magistracy and the Police was 512 as against 381 in the previous year. Though there has been some improvement in this respect, yet the number of premises inspected represents only 37·03 per cent of that licensed. Government once again wish to impress upon all the Officers concerned the importance of the systematic inspection of such premises. As desired in last year's review, the Chief Inspector of Mines is requested to report the localities in which the inspections have not been carried out.

Sixty-two accidents due to explosives involving the death of 21 persons and serious injuries to 70 others were reported during the year as against 47, 11 and 53, the corresponding figures for the previous year. There were 15 cases of prosecution under the Mysore Explosives Rules.

Government are glad to note that the site selected for the location of fireworks shops in Kumbargundi Road, Bangalore City, has since been acquired by the Municipality and that arrangements are in progress for the formation of shop-sites, etc., in accordance with the approved plan.

General.—The work of the Department during the year was satisfactory. Government desire to take this opportunity of placing on record the valuable services rendered by the late Chief Inspector of Mines, Mr. R. Bocquet, who, after a period of 27 years' service, retired in August last.

Annual Rental of Government Buildings.

READ—

Government Order No. P. W. 1773-1839—S., dated the 2nd May 1927, directing that the annual rental of Government buildings be reduced from 8 to 6 per cent on the capital cost, subject to a maximum of 10 per cent of the salary of the officer occupying the building.

2. Note No. D. 400, dated the 15th September 1930, by the Secretary to Government, Public Works Department.

ORDER No. P. W. 1157-1223—6755-6821, DATED 5TH NOVEMBER 1930.

According to the Government Order dated the 2nd May 1927 read above, rent on Government buildings used as residences is levied at the rate of 6 per cent on the capital cost subject to a maximum of 10 per cent of the salary of the officer occupying the building.

2. The rents at present realised from the residential buildings which are expected to pay their way, do not cover the interest on the capital cost and the cost of maintenance. Moreover, there has latterly been an increase in the rate of interest and it is considered necessary that the rent on buildings should be suitably enhanced to make the investment on these buildings yield a fair return.

3. Government are therefore pleased to direct that, with effect from 1st November 1930, the rate of rent be enhanced from 6 to 7 per cent on the capital cost, subject to a maximum of 10 per cent of the salary of the officer occupying the building.

C. C. KRISHNAMACHARIAR

COMPTROLLER OFFICE, BANGALORE.

MYSORE GOVERNMENT LOAN 1930.

No. 477, Loans, dated 13th November 1930.

To

All drawers of Salary and Establishment Bills and Treasury Officers of all District and Taluks.

Has the honor to invite reference to Circular No. 310—Sl., dated 11th August 1930, prescribing the procedure to be followed in the case of recoveries on account of State Loan Advances and to state that deduction statements have in many cases not been received with the Establishment Bills cashed in September 1930.

Deduction Statements have also not been attached to Salary Bills of Officers according to instructions issued to all District Treasury Officers in this office letter No. 316-17—Loans dated 10th September 1930. Owing to this omission the recoveries cannot be posted in the respective loan ledgers without much correspondence. It is therefore requested that in future deduction statements may invariably be attached to salary and establishment bills in which deductions are made so as to avoid unnecessary correspondence and delay in the compilation of the advance accounts in this office.

Bills which do not accompany such statements should not be cashed at the treasuries.

IMPORTANT GOVERNMENT ORDERS.

DEVELOPMENT SECRETARIAT.

Records with observations the Report on the Administration of the Civil Veterinary Department for 1929-30.

READ—

Letter No. C. 776 of 30-31, dated 9th September 1930, from the Director of Agriculture, submitting among others, the report on the administration of the Civil Veterinary Department for 1929-30.

ORDER No. D. 5252-316—C. V. 39-30-3, DATED 15TH NOVEMBER 1930.

Recorded.

There was a marked decrease in the outbreak of Rinderpest during the year as only 995 outbreaks were registered as against 2,288 during the previous year. This is said to be chiefly due to the intensive campaign that has been carried on against the disease by S. S. inoculation whose efficacy has been established beyond a doubt. As pointed out last year, cattle fairs, to which cattle are brought from bordering infected villages, were the chief sources of infection. Another source is said to be the cattle from infected areas purchased by dealers at certain weekly markets and marched through villages in the course of their trade. Government are glad to learn that the rules issued last year for the control of cattle diseases by the prevention of cattle movement from infected areas and the furthering of inoculation, etc., have already been productive of good results. As the Director, however, points out, these rules can be effectively enforced only if the outbreaks of contagious diseases are promptly reported. Though there is said to be some improvement in this direction, yet it is apparent that much laxity still exists in a f[illegible] districts, especially in those of Mysore, Bangalore and Hassan. Government desire [illegible] press upon District Officers the importance of co-operating with the Civil Veteri[illegible]y Department in this matter by taking prompt action against delinquents. The Director is requested to bring to the notice of Government any cases of negligence in this respect. The rules for the control of cattle shows and fairs are under the consideration of Government and when they are brought into force, [illegible] that the chances of infection will be still further reduced.

Owing to the great reduction in the work of inoculation against Rinderpest, it was possible to devote more attention to other contagious diseases, such as, Black-quarter, Anthrax and Hæmorrhagic septicæmia. When Sera and Vaccines for these diseases, also, are manufactured at the local Institute, it will be possible to control them much more effectively.

Hospitals and Dispensaries.—Seven new dispensaries were opened during the year under review bringing their total number in the State to 57. There was a slight fall in the number of cases treated at the Veterinary institutions, which is ascribed by the Director to the outbreak of Foot and Mouth disease having been less severe than in the previous year. As pointed out by the Director, however, there is considerable room for improvement in the attendance at these institutions. He is requested to take necessary action in the matter.

It is gratifying to note that the work of the department is being increasingly appreciated by the public. From all parts of the State, there are insistent demands for the opening of more dispensaries, backed up by offers of assistance by local bodies and private persons. Three new dispensary buildings gifted by philanthropic gentlemen were opened during the year and two more are reported to be under construction. The Director is requested to convey the thanks of Government to the donors.

Cattle Fairs.—Out of 90 cattle fairs held during the year, the staff of the Veterinary Department attended 85, opening temporary dispensaries wherever possible for the treatment of sick animals and demonstrating the simple method of castration by the Burdizzo pincers. The complaint of the Superintendent that these Fairs are held under no definite system and often without giving due intimation to the Department will, it is expected, be obviated when the abovementioned rules for their control are issued.

Breeding Bulls.—Three young Amritmahal bulls were supplied to the Department from the Parvatharayanakere Cattle Breeding Station.

Public Conveyance Animals.—It is pointed out that in the Cities of Bangalore and Mysore many unfit animals are being used for public conveyances plying for hire. The Municipal Councils concerned are requested to take necessary action in the matter.

In reviewing the last year's Administration Report of the Department, the Inspector-General of Police was requested to take steps to see that the police co-operated with Veterinary Officers by taking prompt action when cases of cruelty were reported to them. The Inspector-General is requested to submit a report in the matter at an early date.

Scientific Section.—The two extra Assistant Superintendents engaged in research work were provided with certain laboratory facilities in the Mycological Section of the Department of Agriculture. In addition to assisting the Department in the examination and identification of diseased material, they continued their investigations into the following diseases:—

Johne's disease, Anthrax, Sheep-pox and Parasitic diseases.

Government are pleased to learn that these two officers did good work during the year.

General.—The annual departmental conference was held during the year, as also the second meeting of the Mysore Veterinary Medical Association at which many interesting papers were read and discussed.

Government are glad to note that many non-official gentlemen actively co-operated in the work of the department which was conducted in a satisfactory manner by Major Simpson and his staff.

Filling up vacancies in the Commissioned Ranks of the Mysore Infantry for the next three years.

READ—

Correspondence ending with letter No. C. 1206—29, dated 18th August 1930, from the Chief Commandant, Mysore State Troops, submitting for sanction of Government, a scheme for filling up vacancies in the commissioned ranks of the Mysore Infantry during the current year and the succeeding two years.

ORDER NO. G. 4940-1—MILY. 301-29-8, DATED 8TH NOVEMBER 1930.

The Chief Commandant reports that 17 vacancies are likely to occur in the commissioned ranks of the Mysore Infantry during the current year and the succeeding two years. His proposals for filling up these vacancies are as follows :—

(1) Eleven of these vacancies should be filled by the promotion of non-commissioned officers, if eligible men become available and the remaining six by direct recruitment as per details given in the margin.

	Number of vacancies.	Promotion of non-commissioned officers.	Direct recruitment.
1930 ...	6	4	2
1931 ...	2	1	1
1932 ...	9	6	3
Total ...	17	11	6

(2) If in any year a sufficient number of non-commissioned officers do not qualify themselves for promotion, the number of direct commissions to be granted should be increased to a corresponding extent.

(3) A pass in the S. S. L. C. should be the minimum educational qualification required for a direct commission in the Infantry.

(4) The above estimate of vacancies should be subject to revision if there are any retirements among senior officers or if the re-organisation of the Infantry and the formation of an "A" Class Battalion are sanctioned.

2. Government generally approve of the above proposals regarding the policy to be adopted for the filling up of prospective vacancies in the Commissioned Ranks of the Mysore Infantry. They desire at the same time to emphasise the importance of calling for applications for vacancies to be filled up by direct recruitment and to select candidates as possess, in addition to the minimum educational qualification

prescribed, the necessary physical fitness and have also a special aptitude for entry into the Military Service of the State. Candidates so selected should be appointed on probation for one year and confirmed as Second Grade Jamedars if they satisfactorily complete the necessary training within the period of probation.

3. There are at present three vacancies in the Commissioned Ranks of the Mysore Infantry. The Chief Commandant proposes that one of these may be filled up by promoting Havildar Ramaraj Urs of the 1st Battalion who is the most senior of the Havildars in the three Infantry Regiments and is found to be fit for promotion; and the other two by the direct recruitment of the following two candidates :—

(1) R. V. Karve, son of Mr. V. V. Karve, L. C. E., Superintending Engineer, Shimoga Circle. Qualification : Matriculate. Has experience in the University Training Corps at Bombay.

(2) Ahmed Khan, Assistant Master, Urdu Middle School, Shimoga, Age 21 years. Qualification : School Final Examination.

4. The above proposals are approved. The candidates appointed by direct recruitment will be on probation for one year.

Grant of Lands as a Reward for Military Service.

READ—

Government Order No. G. 8885—Mily. 290-25-6, dated 24th January 1929, issuing revised rules for grant of lands to members of the Mysore Army and Palace Military Establishments.

2. Correspondence ending with letter No. 503—M. S. B., dated 19th August 1930, from the Secretary, Mysore Soldiers' Board, forwarding a draft set of revised rules on the subject.

ORDER No. G. 5292-348—MILY. 53-30-2, DATED 17TH NOVEMBER 1930.

In view of the exacting conditions of military service and the need for making it attractive, the Government of His Highness the Maharaja have considered it necessary to provide for rewarding in a special manner, members of the Mysore Army and of the Palace Military Establishments who have rendered exceptionally distinguished or exemplary military service; and for granting to the families of those who were killed in action or who died or retired after serving in the Great War some means of subsistence in addition to what is given under the Service Regulations. Grant of lands free of upset price appeared to the Government to be the best method of rewarding such services and they have from time to time passed orders issuing Rules under Section 233 of the Mysore Land Revenue Code to regulate the grant of lands in such cases.

The Rules in force till now were those issued with the Government Order of 24th January 1929 read above. As these Rules were found to be defective in certain respects and required to be liberalised, they were referred to the Mysore Soldiers' Board for scrutiny. That Board, under the Chairmanship of Rajamantrapravina Mr. C. S. Balasundaram Iyer, has after considering all aspects of the question submitted proposals for the revision of the Rules in certain respects, the main features of these proposals being the following:—

(1) That in the case of retired officers and men who had rendered field service, though not exemplary, land grant may, according to the practice in vogue, be allowed on a sliding scale in proportion to their field service;

(2) that the families of deceased officers and men not killed in action should be entitled to land grant in the same way as the officers and men would have been, had they applied for the same during their life time;

(3) that with regard to officers and men who have rendered service during peace time, they should be eligible for land grant if they have rendered exceptionally distinguished and exemplary service in addition to service for a period qualifying for full pension;

(4) that for purposes of land grant to clerks, they should be treated as equal to that class of combatants drawing similar pay in the field and should be entitled to get half of what is admissible to combatants; and

(5) that clerks who have rendered exemplary Depot Service during the War should be eligible for land grant.

The Government of His Highness the Maharaja are pleased to accord sanction to the amendments proposed by the Mysore Soldiers' Board. The Rules as revised are appended to this order and will be published in the Gazette for general information and guidance.

R. RANGA RAO,
General Secretary to Government.

RULES FOR THE GRANT OF LAND AS A REWARD FOR MILITARY SERVICE.

1. The grant of land is in addition to pension, if any, earned by the individual. It must be understood, however, that the grant of land being a bounty from Government, no person can claim it as a right.

2. These concessions will not apply to persons who retired prior to the issue of the Military Settlement Order of 1917, unless they have rendered Field Service during the last War.

3. Men who take their discharge voluntarily will not also be entitled to these concessions unless they have rendered field service.

4. The cases of those who are entitled to land grant under the Order of 1917 but have not yet been granted lands should be dealt with under these rules.

5. The Commandant of the Regiment may, immediately before or after the retirement of a soldier, or after the death of a soldier or at other time when an application is received and a grant is due under these rules, make a recommendation to the Chief Commandant for the grant of lands to the soldier or his family as the case may be. If the soldier is eligible for the grant of land and the Chief Commandant is of opinion that, in consideration of the soldier's exemplary and distinguished conduct while on field service or on account of the injuries received in action or exemplary or distinguished services in peace time, the concession may be shown to him, the Chief Commandant will submit his recommendation to Government.

6. In cases under Clause (i) of Rule 8, the recommendation may be sent up as soon as an applicant becomes eligible for the concession without waiting for his retirement. Full information should be given when making the recommendation to enable Government to decide the case on its merits.

7. The Kille Kacheri Bakshi in respect of the Kille Kacheri and the Palace Band, and the Commandant of the Body Guard in the case of the Body Guard will send up recommendations for the grant of lands to men in these units to the Huzur Secretary who will satisfy himself as to the eligibility of the individuals for the grant and forward the applications to Government.

FIELD AND PEACE SERVICE—EXEMPLARY.

8. For purposes of these rules, the term "Exemplary Military Service" shall mean:—

(i) Devotion to duty or other acts of gallantry, conspicuous acts of bravery in the Field and shall include cases of injuries received in action.

(ii) Continuance in service for 15 years with field service.

(iii) Exceptionally distinguished and exemplary service for a period qualifying for full pension during peacetime.

(iv) Also any other act deserving special notice and worthy of a suitable reward at the pleasure of Government.

9. The extent of land to be granted under these rules to a soldier or his family shall not exceed the following scale:—

	ACRES		
	WET		DRY
Commandants	20	or	45
Resaldars and Subedars	12	or	30
Jamedars	8	or	20
Non-Commissioned Officers of and above the rank of Duffedars or Havildars	5	or	15
Other ranks	3	or	8

NOTE—(i) The extents noted above are the maxima which should be granted in rare cases. But in cases of extraordinary distinguished service in the field even this maximum extent may be exceeded. In cases of men killed in action their families may be granted lands on a scale which is 50 per cent in excess of what the deceased men would have been entitled to had they lived to apply for the grant.

(ii) Cases under clauses (ii) and (iii) of Rule 8 will be eligible for the grant of lands up to 50 per cent of the extent mentioned in Rule 9 above.

(iii) The Medical Officers, Veterinary Officers and Hospital servants of the several Units still serving who have been on field service for not less than six months and have rendered exemplary service will be eligible to the same extent as is admissible to Military Officers of corresponding rank and to followers, respectively.

(iv) Non-Combatants such as clerks, followers, etc., of the Mysore units who have been to the front and rendered exemplary service for not less than six months may be given the benefit of the land reward under the rules, the extent admissible being half of what is admissible to Combatants under Rule 9. The Clerks should be considered equal to that class of combatants drawing similar pay in the field and followers, to other ranks.

(v) Clerks who have rendered exemplary Depot service during the war will be eligible for the concession. Their service in the Depot will count as half war service and the scale is as mentioned in Rule 10 below—

FIELD SERVICE—NON-EXEMPLARY.

10. Retired Officers and men who rendered field service without any distinction will be entitled to land grants on the following scale:—

For a field service of 5 years and 4 months. Full extent admissible to the respective ranks according to Rule 9 above.

For a field service of 3 years and under. Three-fourths extent admissible to the respective ranks according to Rule 9 above.

For a field service of 1 year and under 3 years. Half the extent admissible to the respective ranks according to Rule 9 above.

For a field service of less than one year. One acre of wet or 4 acres dry.

11. The families of deceased officers and men who rendered field service will be entitled to the same concession as they would have got if the deceased had lived and applied for lands under the above Rules.

12. The preliminary enquiry as to the eligibility of a person for the grant of land shall be conducted in the Military Department or in the Kille Kacheri, Palace Band, or Body Guard Departments according to the Unit to which the individual belongs. After the recommendation is sanctioned by Government, all further action will rest with the Revenue Authorities.

13. Wet and dry lands granted under these rules will be held free of assessment during the first two years in all cases and at the descretion of the Revenue Commissioner at half assessment for a further period not exceeding three years. Full assessment will be payable from the sixth year onwards in all cases.

14. The lands granted under these rules shall not be sold, mortgaged or otherwise alienated within a period of fifteen years from the date of grant. This rule will be applicable to individuals who become entitled to grant of lands hereafter. No person already in possession of lands under the rules in force so far or the heirs or assigns of such person will be deprived of them or of any concession already granted to them so long as the condition of the grant is fulfilled.

15. Persons who become entitled to the grant of land under these rules may apply for unoccupied assessed and unassessed lands available for cultivation to the extent admissible in any locality selected by them except under the Krishnarajasagara and in other areas that may be notified by Government from time to time.

N.B.—The reservation of lands for grant under these rules ordered in Government Orders Nos. G. 3512-15—Mily. 172-15-17, and G. 19630-40—Mily. 274-20-2, dated the 12th September 1917 and 15th April 1921, respectively, has been cancelled.

16. The value of lands given free of cost under these rules shall not exceed Rs. 200 per acre in the case of wet lands and Rs. 100 per acre in the case of dry lands. In cases where the estimated value of the land applied for exceeds the value limit prescribed above, the extent to be granted may be correspondingly reduced, to keep the grant within the money limit prescribed.

17. The Deputy Commissioners of Districts will maintain lists of persons to whom land grants have been sanctioned or may hereafter be sanctioned in their Districts under these rules. They should also instruct the Amildars that whenever applications for the grant of lands sanctioned are forwarded to them for making the necessary assignment or allotment to the party concerned, they should furnish a report to the effect that the allotment has been made and that the condition of the inalienability of the land for fifteen years is entered in the Khetwar Patrike and in the Saguvali chits. Applications from Military men for lands are expected to be disposed of promptly. For the speedy disposal of cases of land grants, the Chief Commandant may depute one of his officers to interview the Deputy Commissioners of Districts periodically for facilitating the disposal of pending applications.

A consolidated list of persons to whom land grants have been sanctioned under these rules will be maintained in the Office of the Revenue Commissioner.

No. 477, Loans, dated 18th November 1930.

To

All drawers of Salary and Establishment Bills and Treasury Officers of all Districts and Taluks.

Has the honor to invite reference to Circular No. 310—Sl., dated 11th August [illegible], prescribing the procedure to be followed in the case of recoveries on account of State Loan Advances and to state that deduction statements have in many cases not been received with the Establishment Bills cashed in September 1930.

Deduction Statements have also not been attached to Salary Bills of Officers according to instructions issued to all District Treasury Officers in this office letter No. 316-17—Loans dated 10th September 1930. Owing to this omission the recoveries cannot be posted in the respective loan ledgers without much correspondence. It is therefore requested that in future deduction statements may invariably be attached to salary and establishment bills in which deductions are made so as to avoid unnecessary correspondence and delay in the compilation of the advance accounts in this office.

Bills which do not accompany such statements should not be cashed at the treasuries.

ANNEXURE.

Improvement in Paddy Cultivation in the Mysore Channel Tract,

NOTE BY MR. A. K. YEGNANARAYANA IYER.

Improvements in the cultivation of paddy in the Channel Tracts of the Mysore District where paddy is the crop of outstanding importance have consisted in the introduction of better varieties, of the use of artificial manures and the reduction in the seed rate. In regard to varieties, among the large number of varieties which were tested on the Nagenhalli Farm, the Coimbatore strains called Nos. 1 and 24 more especially the latter having been found to be high yielders of uniform growth and with a high milling percentage and a rice of especially choice kind, the two varieties have been slowly taken up by the raiyats all over the tract. At the present time, these two varieties may be said to be grown on hundreds of acres, and the Coimbatore sanna, the popular name given to the No. 24 has become a highly sought-after variety in the Mysore market. At seedling time, the variety is so greatly in demand that as much as Rs. 5 per candy is gladly paid over and above the rate for the local varieties. This is perhaps a unique instance of the rapidity with which work on a Government Farm has been taken advantage of by the tract which the Farm was expected to serve.

Equally outstanding is the use of artificial manures which is rapidly increasing in the Channel Tract. Time was, not many years ago, when the raiyats would not as much as look at a manure like oil-cakes, and the Department had great difficulty in disposing of the stocks of this manure which had been purchased with more optimism than the sequel showed to be correct. This was hardly ten years ago and now a thorough change has come about. At the present time not only is a large quantity, perhaps the whole of the production in Mysore City taken up by raiyats of their own accord but the manures of which they had not even heard, such as sulphate of ammonia and superphosphate, are beginning to be purchased in several tons. From small beginnings, the use has gone up so high that selling organisations of manure companies have opened several sale depots in the area. Messrs. Brunner Mond & Co., and Shaw Wallace & Co., are pushing the trade with great earnestness to which the raiyats too are responding. Besides, two central sale depots in Mysore City, there are two in Bannur, two in Yedatore, one in Kariahalli, not to speak of depots of Village Panchayets which is a feature of work in the Mysore District. Bherya, Tippur and Akkihebbal are three good examples and each has been handling from 4 to 5 tons per year. In addition there are private dealers who are also, in view of the prospective profits, slowly taking up the sale of these manures. To one who knows only the condition of ten years ago this transformation will appear almost unbelievable.

While on the subject of manures, the work on the popularisation of green manure in the Yedatore tract where it is in vogue, with the help of a special grant from the District Board for the sale of seed at concession rate must be referred to; likewise the scheme for the starting of plantations of honge trees throughout both in the present channel tract as also in Mandya and Malvalli, the future centres of paddy cultivation, has been making very noteworthy progress, and in a few years, a changed landscape will bear witness to the work. The economising of the seed rate by the expedient of planting fewer seedlings has also become a well established practice and has meant considerable saving in the aggregate.

As all these abovementioned lines of activity progress from year to year, we should to the same measure be greatly increasing the outturn of paddy in the tract and also the money return therefrom to the raiyat. The last named, *viz.*, the matter of the planting of honge trees would moreover be creating a permanent asset to the paddy grower. It behoves us, as far as may be practicable, to take such measures as will speed up progress in all these directions. One serious circumstance which makes progress slow and even hinders it altogether is the fact that the raiyat, however much he may be anxious to use artificial manure does not possess the necessary ready money to purchase them when they are wanted and has, therefore, to go without it. Even the well-to-do raiyats are almost in the same boat with their poor brethren in this matter, because the financing of the transplanting work in that busy time is about all that they could do, and as that operation is more important than the manuring, they let the latter suffer. How to afford them financial help or accommodation for a temporary period of say, six months is a problem which must be solved. Neither the Co-operative Societies nor village Panchayet can under present circumst

though they are most excellent agencies for the purpose. Societies do not possess the funds and even if they did, they cannot serve anything more than a limited clientele, while the Village Panchayets which can serve a large number are quite unwilling to take up sale on credit with its attendant risks. It is a point for consideration whether a takkavi system where procedure would be as simple and quick as a Post Office transactions cannot be devised, so that this serious handicap may be remedied.

The next point in the improvement of paddy cultivation has reference to a more difficult aspect of farming. Not long ago, a series of newspaper articles were published by Mr. A. Galletti, I.C.S., a talented Madras Civilian Officer who attempted to explain the superiority of the Italian method of paddy cultivation over those in vogue in our country. His observations took into consideration with much accuracy and knowledge of detail, all our local circumstances in regard to Farm Economy and methods in general. He held up as a model the combination of animal husbandry, chiefly the keeping of milk cattle, with paddy farming. His chief point is that paddy should be rotated with fodder crops, land being temporarily laid down to pasture, and so on; going into detailed calculations, he contended that though there may be a reduction in the area under paddy, the system resulted in a high yield of paddy and a greater money return to the Farmer not to speak of the equally important consideration, *viz.*, better cattle, more milk and better health and all this with a lesser consumption of irrigation water. In view of the fact that the large expansion in paddy cultivation which is in prospect under the Irwin Canal and the Schemes intended to utilise to the full the Cauvery Water to which our State has been deemed entitled, is to be in a tract which is at present the home of our cattle breeding industry, this new idea assumes great importance. Our cattle industry which is unique and which brings in several lakhs of rupees annually into the State from outside is certainly not as prosperous as it might be; and if my impression is correct, it is distinctly on a downgrade. This combination of cattle rearing and paddy cultivation which is claimed to be advantageous to both will therefore meet our needs admirably if it should be only possible to effect this change in our methods. It is no doubt a change which may be difficult to bring about; but if we bring it about; it will mean according to this writer a most prosperous paddy tract valuable facilities and a great impetus to cattle raising and a more economical use of the water now being harnessed to irrigation at great cost. The need is, however, a closer study of this method on the spot, *i.e.*, in Italian paddy farms by a man with a good knowledge of our own local conditions in paddy cultivation and the rural economy in general of our new irrigation tract, and later the testing and demonstration of the methods on the Government Farm. The matter aroused great interest at the time of the publication of the articles in question judging by the correspondence in Press. I myself also corresponded with the writer to elucidate certain points, but without a close practical study of the matter it is not possible to make any recommendations along these lines. If the Conference agrees in considering that this matter merits action as suggested and recommend it, I am of opinion that another very useful step would have been taken in the improvement of paddy cultivation. Two suggestions are therefore submitted for consideration on this note, *viz.*, (1) a suitable simple scheme for the granting of short term takkavi loans for the purchase of paddy manure, and (2) the deputation of an officer for the study of the methods of paddy farming in Italy referred to.

Reviews the Report on the Administration of the Department of Geology for the year 1929-30.

READ—

Letter No. 5017-10, dated 20th September 1930, from the Director of Geology, submitting the Administration Report of the Department of Geology for the year 1929-30.

ORDER NO. D. 5560-65—GEOL. 32-30-3, DATED 21ST NOVEMBER 1930.

Recorded.

I. ADMINISTRATION.

Mr. P. Sampathiengar, the Director, was in charge of the Department during the year, except for a period of 3 months from 1st April 1930 when he was on privilege

Government sanctioned the loan of the services of Mr. B. Rama Rao, Assistant Geologist, to the State of Baria in the Rewakantha Agency. The number of posts of Sub-Assistant Geologists was increased from 1 to 2 from 1st July 1929 and Mr. V. T. Venugopal (supernumerary) working in the Mysore Iron Works was absorbed in the cadre of the Department and seconded. One of the Assistant Geologists, Mr. B. N. Venkataramiah, B.A., retired on 16th February 1930 after a creditable record of nearly 23 years service. As in previous years, the main administrative work of the Department was connected with the working of the rules for the grant of certificates of approval, prospecting licenses and mining leases.

REVISION OF RULES.

Draft revised rules relating to prospecting licenses and mining leases for minerals other than gold, as also a set of new rules for the working of small mines framed by the Director of Geology in consultation with the Chief Inspector of Mines are under the consideration of Government. The uniform rate of royalty of ten annas per ton on all Manganese ores, irrespective of grade, which was in force from 1st April 1928 was ordered by Government to be continued until further orders.

A renewed mining lease for Chrome ore over the Pensamudra Block, Arsikere Taluk, was granted in March 1930 to the Mysore Chromite Ltd., for a further term of ten years.

MINING REVENUE.

Out of a total demand of Rs. 89,790-13-9 on account of mining revenue exclusive of the royalty on gold, a sum of Rs. 88,917-3-3 was realised leaving a balance of Rs. 873-10-6.

II. INSPECTIONS.

Most of the current prospecting license and mining lease areas were inspected by the Officers of the Department during the year, as also the Chrome Mining Operations at Byrapur and Tallur.

III. MINING AND PROSPECTING.

There were 21 certificates of approval, 43 mining leases and 18 prospecting and other licenses current during the year as against 34, 44 and 22 respectively in the previous year. The results of the working of the five gold mining companies on the Kolar Gold Field during the year were as follows:—

	1928-29. Actuals.	1929-30. Approximate.
	Ozs.	Ozs.
Total quantity of fine gold produced ..	368,592	327,000
	Rs.	Rs.
Value	2,08,99,390	1,86,25,508
Royalty due	11,46,806	10,21,394

As regards Manganese, there were 9 leases and 10 licenses current. The total output was 44,150 tons and the royalty recovered was Rs. 11,767-12-6. The market for this mineral continued to be full throughout the whole year with the result that many of the mines practically ceased operations. The United Steel Companies Ltd., of Shimoga, however, continued to do fairly good work on their mining and prospecting blocks, as they were able to find a market and use for low grade ores (30 per cent and below) for the removal of which certain concessions were granted to them by Government. The mining lease for chromite over the Pensamudra Block, Arsikere Taluk, which had expired towards the close of last year was renewed during this year. There was not much demand for this mineral. The output was 20,586 tons and the royalty recovered amounted to Rs. 16,096-9-10. The output of magnesite on the only block (Dodkanya) on which work was carried on was 1,275½ tons and the lessees paid a dead rent of Rs. 1,760 for the year and no royalty was levied.

The output of kaolin from the two blocks worked by the Kolar Brick-making Co., Ltd., was 3,273 tons. The entire quantity was removed from the block and the royalty paid was Rs. 2,628.

DEPARTMENTAL MINING.

The total output of chrome ore at the Byrapur Mine was 5,381 tons out of which only 750 tons were sold for a sum of Rs. 16,500. At Talur 850 tons of chromite out of 1,081 tons mined were sold for Rs. 17,000. The occurrence of chromite was noticed in a few other localities and some prospecting work done near Devanur in the Kadur Taluk. Only low grade ore was, however, found. Prospecting for galena and antimony ores near Chitaldrug was continued. About 24 tons of graphite were mined in the Bowringpet Taluk and supplied to the Mysore Iron Works for foundry purposes. The authorities of the Mysore Iron Works raised 42,949 tons of iron ore from the Kemmangundi Hills and 1,735 tons of silicious iron ore from deposits near Tanigebyle during the calendar year 1929 for their works at Bhadravati.

IV. GEOLOGICAL SURVEY.

(a) About 300 square miles were geologically surveyed in parts of Tarikere, Kadur and Arsikere Taluks. An area of about 25 square miles in the Chitaldrug District containing galena and antimony bearing rocks was surveyed and mapped in detail.

(b) *Practical Training.*—The students of the B.Sc., Honours Class of the Central College were given practical instruction in Geological Survey and prospecting methods at the Byrapur Mine.

(c) *Soil Survey.*—The soil survey of the lands under the Maddur Branch of the Irwin Canal was conducted in co-operation with the Department of Agriculture and an elaborate report on the same is to be published shortly.

V. ENGINEERING AND ALLIED ACTIVITIES.

Technical advice in connection with the Anjanapur Dam in the Shimoga District, the "Talparagis" (natural sources of irrigation) of the Tumkur District, and the Meruvanji Tank in the Channagiri Taluk and water supply questions was furnished by the department.

The Director again points out the necessity for keeping a systematic record of all geologic and economic information obtained during well-boring operations in order to secure reliable scientific data which will be of great use in similar undertakings in future. The Director of Industries and Commerce is requested to see that such a record is maintained and that the co-operation of Geological Department is enlisted as far as possible in well-boring and well-sinking operations.

VI. ECONOMIC INVESTIGATIONS.

(*a*) *Ferro-Chrome Experiments.*—It is reported that the preliminary experiments conducted in the manufacture of ferro-chrome met with a fair amount of success and that further trials are in progress.

(*b*) *Free Silica contents in Kolar Gold Field Rocks.*—Information regarding the free Silica contents in Kolar Gold Field rocks was furnished to the Government Mining Engineer, Department of Mines and Industries, Johannesburg, South Africa.

VII. CHEMICAL LABORATORY.

Government are glad to note that the new chemical laboratory attached to the department worked satisfactorily during the year and that the two chemists in charge thereof were kept fully engaged in analysing samples for Government departments and the public.

VIII. PUBLICATIONS.

A bulletin on the copper ore deposit of Ingladhal near Chitaldrug was published and an up-to-date compilation on the mineral resources of Mysore was completed and sent to the Press.

IX. CONCLUSION.

The work of the Department during the year was satisfactory and Government wish to record their appreciation of it.

Amendments to the bye-laws of the Mysore Co-operative Land Mortgage Bank.

READ—

Government Orders No. G. 5927-8—L. M. 4-29-3, dated the 11th November 1929 and No. G. 13303-5—L. M. 4-29-6, dated the 12th May 1930, approving the bye-laws of the Mysore Co-operative Land Mortgage Bank.

2. Letters No. 1653, dated the 18th September 1930 and No. 1735, dated the 20th September 1930, from the Registrar of Co-operative Societies in Mysore, forwarding with his observations letters in original received from the President, Land Mortgage Bank, proposing certain amendments to the bye-laws approved in the Government Orders read above.

ORDER THEREON NO. G. 5674-8—L. M. 12-30-3, DATED 27TH NOVEMBER 1930.

The following amendments have been proposed:—

Bye-law 38.—According to this bye-law, loans may be granted only to members. In the case of individual members, the Board of Directors propose to restrict the issue of loans only to "*bona fide* agriculturists;" intending thereby to debar absentee land-lords from being eligible for the grant of loans, so as to obviate the possible misuse of such loans. Government, however, do not consider it either expedient or desirable to make the restriction. The Board has ample power under bye-law 39 to reject any *mala fide* applications whether from absentees or residents, so that no useful purpose is served by the proposed amendment.

Bye-law 48.—Under this bye-law, it is provided that long term loans granted by the Bank shall not exceed 50 per cent of the value of the property mortgaged to the Bank for the loans. The Board of Directors consider that in view of the possibility of the rapid deterioration and consequent fall in the value of coffee and cardamom lands on account of the serious fluctuations in the price of these commodities, etc., the Bank will be taking considerable risks in granting loans up to the limit prescribed above. They, therefore, propose that the limit may be lowered in the case of the above lands. Government agree with this view and are pleased to approve the proposal of the Registrar to limit the amount of loans to be granted to owners of coffee and cardamom lands to 40 per cent of the value of the mortgaged properties. This shall, however, be considered only as a working rule and need not be embodied in the bye-laws.

Bye-laws 58 and 78.—The Board of Directors propose to amend bye-law 58 so as to vest the administration of the Bank in the Board and subject to their control and delegation, in an Executive Committee consisting of the President and not more than four other Directors. The Registrar of Co-operative Societies is of opinion that no change is called for in this bye-law, as under bye-law 73, the entire executive authority (and not the entire "administration") is vested in the Board and under bye-law 78, they have power to appoint Sub-Committees from among themselves for dealing with questions not involving lines of policy or matters of special importance. Government agree with the Registrar, but they consider that the appointment of an Executive Committee with power to exercise delegated functions requires more specific authority than is conferred on the Board by bye-law 78. They are therefore pleased to direct that the following addition be inserted after the first sentence of bye-law No. 78 :—

"Among other matters, such instructions may provide for the disposal of the routine and urgent business of the Bank by an Executive Committee consisting of the President and not more than four members of the Board. The Executive Committee shall exercise such functions and powers as may be delegated to it by the Board and its decisions shall be subject to revision by the Board".

Bye-laws 70 and 74.—In view of the large expenditure involved in convening a meeting of the Board of Directors and in view of the fact that all the outstanding questions of importance relating to the working of the Bank have been considered and settled, it is proposed to hold the meetings of the Board once a quarter instead of once a month. Government approve of the proposal and are pleased to direct that bye-laws 70 and 74 be amended as follows:—

Instead of the words "the meetings of the Board for three consecutive months" occurring in bye-law 70, insert the words "three consecutive meetings of the Board" and in bye-law 74, instead of the words "once a month" insert the words "once a quarter".

Review of the Administration Report of the Stamp Department for the year 1929-30.

READ—

Letter No. Camp 1—30-31, dated 3rd—4th October 1930, from the Commissioner of Stamps, forwarding the annual report on the working of the Stamp Department for 1929-30.

ORDER NO. FL. 4550-60—ST. 11-30-3, DATED 26—28TH NOVEMBER 1930.

Recorded.

2. The year under review witnessed the following important improvements :—

(*a*) The rules relating to the refund and renewal of court-fee stamps were revised.
(*b*) With a view to the creation of better facilities to the Public, new denominations of court-fee stamps, *viz.*, 5 annas, 10 annas, and Rs. 1-4-0 were added and issued from 1st July 1929.
(*c*) To secure effective improvement in the adhesive quality of court-fee labels and receipt stamps, gummed water-marked papers were obtained and used.
(*d*) To ensure the expeditious perforation of stamp sheets in the Stamp Manufactory, the Grover Perforating Machine was ordered to be obtained and used.

3. The year showed a decline of revenue from Rs. 23,25,330 of the previous year to Rs. 22,17,542. The decrease was mainly occasioned by diminished sale of court-fee and general stamps and is attributable to unfavourable seasonal conditions and the tightness of the money market leading to a fall in the number, as well as the value of suits filed.

4. Government observe that during this year a sum of Rs. 8,137-14-0 only out of a total demand of Rs. 90,321-14-0 under institution fees awarded in pauper suits was recovered and a sum of Rs. 5,800 was remitted leaving for recovery a heavy balance of Rs. 76,384-0-0 at its end. The Commissioner of Stamps is requested to issue necessary instructions with a view to the very early realisation of all recoverable arrears outstanding.

5. Government are glad to note that steps are being taken to reconcile the differences in the consolidated accounts of the Mysore District Treasury and trust that the satisfactory progress achieved in this important item of work will continue to be maintained in the succeeding year in respect of the accounts of all the treasuries. The discrepancies under general stamps of the Mysore District may also be traced, analysed and adjusted before the next report is submitted to Government.

MYSORE GOVERNMENT LOAN 1930.

No. 477, *Loans, dated* 13*th November* 1930.

To

All drawers of Salary and Establishment Bills and Treasury Officers of all Districts and Taluks.

Has the honor to invite reference to Circular No. 310—Sl., dated 11th August 1930, prescribing the procedure to be followed in the case of recoveries on account of State Loan, Advances and to state that deduction statements have in many cases not been received with the Establishment Bills cashed in September 1930.

Deduction Statements have also not been attached to Salary Bills of Officers according to instructions issued to all District Treasury Officers in this office letter No. 316-17—Loans dated 10th September 1930. Owing to this omission the recoveries cannot be posted in the respective loan ledgers without much correspondence. It is therefore requested that in future deduction statements may invariably be attached to salary and establishment bills in which deductions are made so as to avoid unnecessary correspondence and delay in the compilation of the advance accounts in this office.

Bills which do not accompany such statements should not be cashed at the treasuries.

2. Any person bidding at the sale may be required by the officer conducting the sale to state whether he is bidding on his own behalf or as an agent, and in the latter case to produce a written authority duly signed by the principal.

3. The highest-bidder shall ordinarily be the purchaser, but the officer conducting the sale can reject any bid or stop the sale at any stage without assigning any reason to the ntending purchasers.

4. Immediately after the lot is knocked down to him, the successful bidder shall sign his name opposite the number and specification of the lot bought by him in a book provided for the purpose. Such signature shall be held as admission on his part of having bought such lot and of having accepted the terms of sale as herein specified. All sales of which the amount exceeds Rs. 500 in each case are subject to the confirmation of the Chief Conservator and in other cases to that of the District Forest Officer.

5. After conclusion of the sale, each purchaser shall pay 10 per cent of the amount in cash to the officer conducting the sale and obtain in return from him a receipt vouching for he payment of the one-tenth value as well as the initial deposit of Rs. 200. Should any purchaser fail to comply with this rule, the initial deposit of Rs. 200 shall at once be forfeited to Government and the officer conducting the sale shall be at liberty to resell the timber purchased by such defaulter who shall be required to make good any loss, but shall not participate in any profit from such resale. The amount due by such defaulter on account of loss from resale shall be recovered from him as a revenue demand under section 79 of the Mysore Forest Regulation. In calculating such losses, the initial deposit forfeited to Government shall not be taken into account.

In cases of resales for default of payment of value where no bidders are forthcoming, it will be open to the District Forest Officer to fix such price as may appear to him to be reasonable and to proceed for the recovery, from the defaulter, of the balance if any, after deducting the price so fixed from the original sale amount. A registered notice should be issued, to the defaulter intimating the price fixed by the District Forest Officer for the unsold wood and the amount still due from him will be recovered as arrears of land revenue.

6. The deposits tendered by unsuccessful bidders shall be returned immediately after the sales are concluded, those of successful bidders being lodged in the Savings Bank as security deposit.

7. The full value of all timber purchased shall be paid for within 30 days after the date of sale or within 15 days after the date of the notice of confirmation of the sale, whichever is later. In case of purchasers of above Rs. 1,000 in value, the purchaser shall be permitted to pay up the balance in instalments of not less than Rs. 1,000 provided the full value is paid not later than the 15th May 1931. The money shall be paid into such treasury as the District Forest Officer may direct, within the time specified.

8. If the amount is not fully paid by the purchaser before the dates fixed above, the initial deposit as well as the other moneys already paid in shall be forfeited to Government and all or any portion of the timber not fully paid for shall be resold at the risk of the purchaser in the manner prescribed for default of payment of one-tenth value in clause 5 *supra*.

9. No timber lot shall be permitted to be removed by the purchaser unless it has been paid for in full, calculated at the rates at which the timber is knocked down to him at the time of sale, excluding the 10 per cent deposit paid for the lot at the time of the sale, and no timber shall be removed from the depot unless a permit is obtained from the Forest Officer in charge of the depot. The earnest money will not be adjusted towards the value of timber, until 90 per cent of purchase money over and above the security deposit has been paid.

10. Timber purchased should be removed as early as possible, and in no case should it be allowed to remain longer than 90 days after the dates fixed in clause 7 *supra*. Timber not removed after purchase, will remain in the Depot at the risk of the purchaser from the date of the confirmation of the sale.

11. If the timber is not removed within the time allowed, the same may, after ten days' notice to the purchaser, be sold in public auction and the proceeds will be given to the purchaser after defraying all the expenses in connection with the resale.

12. The deposit of Rs. 200 will remain as security for the due fulfilment of all and every one of the terms of sale, on the breach of any of which by the purchaser, the District Forest Officer shall be entitled to forfeit the deposit in whole or in part and in the event of such forfeiture, the sum so forfeited, shall be immediately made good by the purchaser so long as the transaction is not finally closed. The Security Deposit or the balance thereof, if any, shall be returned to the purchaser after the full value of timber purchased has been paid for and the timber fully removed.

No. 7283-7302, *dated* 15—27*th November* 1930.

To

The Firms dealing in Machinery.

Gentlemen,

LATHES.

Please be good enough to let us have your best prices and terms of delivery for the lathes described in the attached specifications, so as to reach the undersigned by the 20*th of December* 1930.

2. The prices to be quoted should be for free delivery, f.o.r. Maddur, Mysore Railways, and full details and illustrations of the lathes offered should be sent along with the quotations.

SPECIFICATION FOR THE MOTOR DRIVEN FACING AND BORING LATHE.

The lathe should be motor driven with change speed levers. The motor should be suitable for 110 volts D.C. and should be provided with a starter and speed controller, so that a revolution of 2 or 3 R. P. M. could be obtained when handling works of very large diameter.

2. The head stock and headstock shaft should be of sound construction sufficiently strong for holding large turbine covers weighing up to one ton. The present equipment required is only a plain face plate about 8 feet in diameter to hold work up to 84" diameter. This should be suitable for fixing a chuck later on.

3. It is expected that the mounting of the head stock shown in the sketch will admit of the lathe, handling work up to 84" diameter without any gap in the bed. This requirement is necessary so that the central rest bed could be extended later on when necessary. For the present, it is sufficient if a length of centre rest bed is supplied so that the distance between the centres is 4 feet. The bed to be supplied now should, however, be suitable for fixing extensions later on.

4. The tool rest must be provided with a boring attachment driven by an independent 110 volt D.C. motor complete with its own starter and speed controller. The tool attachment and motor should be suitable for drilling holes in the side covers of the turbines upto 3" diameter.

5. The surfacing and boring tool must be able to serve the full diameter of the work upto 84" radially for the distance between centres, that is, 4 feet. When the centre rest bed is extended, the extension should be provided with faced flanges and extra tool rest guides so that the tool may be able to serve for the full distance between centres when extended.

Note.—This lathe is intended for installation on the floor of the turbine room where it is required for very accurate work in connection with the surfacing and drilling of hydraulic reaction turbine side covers and also for surfacing journals and shafts. The lathe and accessories must be suitable in every respect for the heavy weights that are to be handled and for doing accurate work. The machine should be suitable for installation on the floor of the turbine room without making any pits and all the movements required for working the lathe should be arranged to be obtained by independent motors and gearing, so that no overhead shaft and pulleys will be necessary. The machine is intended for trueing the facings of side overs up to 84" diameter and for handling shafts later on up to 10 feet in length. The machine to be supplied should be suitable in all respects for the combined duty required of it as it is the intention to make the machine serve the purpose of a lathe and a drilling machine as far as the work in the turbine room is concerned. It is desirable that the machine should be of the horizontal axis type so that large and heavy shafts could be handled later on. All the parts of the machine must be made of first class material with ample factor of safety and every way in accordance with up-to-date practice in machine tool construction.

No. S. P. C., dated 15th November 1930.

SPECIFICATIONS FOR 20" GAP ENGINE LATHE FOR SLIDING, SURFACING AND SCREW CUTTING.

The principal dimensions of the Lathe must be as follows:—

(1) Swing over ways	20"
(2) Swing through Gap	44"
(3) Length of Bed	14 ft.
(4) Gap opening	22"
(5) Distance between centres with gap fully opened...	Not less than 10 feet

2. Bed should be of strong box section similar to the design shown in the drawing with supporting standards, providing receptacles for tools, change gears, etc., and should be amply strong for providing stability and strength when cutting with high speed steels.

READ—

The following summary of representation No. 44, brought up for discussion at the Dasara Session of the Representative Assembly of 1930, by Mr. Puttamadappa of Nanjangud, about the removal of the restriction of offering "Thulabara Seva" to Sri Srikanteswaraswamy at Nanjangud in the temple premises:—

"The present restriction of offering "Thulabara" to the Srikanteswaraswami at Nanjangud in the temple premises and handing over both jaggery and kanike to the temple has caused much inconvenience and hardship to the devotees who visit the temple. It is requested that this restriction be removed and due publicity given to the fact of having done so, both in and outside the State."

2. Correspondence ending with petition dated 21st October 1930, received from Mr. T. V. Subbiah of Nanjangud on the subject, referred to above.

ORDER No. 1288-90—MUZ. 117-30-16, DATED 5—8TH DECEMBER 1930.

Mr. Puttamadappa in urging the representation at the Dasara Session of the Representative Assembly of 1930 stated that according to Mamool Thulabara done outside the temple and Santharpane held on the banks of the river or elsewhere, by devotees, and that the present arrangement under which the "Thulabara Seva" was required to be held in the temple premises, was felt as a hardship by the people and requested that the restriction might be removed.

Government are pleased to direct that the holding of Thulabara may be left entirely to the option of devotees. There should be no insistence on its being held in the temple or on the jaggery being made over to the institution.

No. G. 5940—*Census.* 1-30-6, *dated 6th December,* 1930.

"The following forms of General Schedule, the House-hold Schedule and the instructions for filling up the General Schedule are hereby published for general information as contemplated in para 5 of Government Notification No. G. 404-60—Census 2-30-2, dated 11th July 1930."

By Order,

B. NARAYANASWAMI IYENGAR,

Development Departments.

APPENDIX I.

INSTRUCTIONS FOR FILLING UP THE GENERAL SCHEDULE.

1. Column 1. (House Number).—Here enter the census number of the house. If it is unoccupied write "empty" after the number in column 2, and leave the rest of the line blank. Deal similarly with a house to which a House-hold Schedule has been issued and write "House-hold Schedule" instead of "empty" in columns 2 and 3 against the house number. If you find a "dwelling house" without a number, report the fact to your Supervisor and proceed to make entries for it giving it a sub-number after the number of the preceding house. Thus if the number on the previous house is 26, number this one as 26/1. Be careful to enter the number of a house only after you have completely enumerated the inhabitants of the *preceding* house. When the entries for a house have to be continued on the next page, write the house number on that page also and add the word "continued."

2. Column 2 (The enumerator should not fill up this column. *When the final enumeration is over,* the serial number for all persons enumerated will be filled up by the Supervisor.)

3. Column 3 (Name).—Ask who is the head of the family and enter his or her name first in this column. Then enquire for the names of the other members of the family; then for the names of any servants who live in the house and take their meal there; and write down their names. Prefix the relationship of each person to the head of the family, *e. g.*, son X, daughter, Y, servant Z and so on. If there be any objection made to giving the name of a woman, write the word "woman" for the name, and fill up the rest of the schedule as usual. If an infant has not yet been named, enter the word "infant." If any woman is unwilling to give her own or her husband's name, ask some one else for the information.

Enter the names of all persons permanently residing in the house. *Those who may be casually absent at the time of your visit for preliminary enumeration provided they are likely to return before the night of the final census, should all be entered.* Conversely, casual visitors present at the time of preliminary enumeration who will return to *their* own houses before final Census, should be omitted.

Chaukidars and persons spending the night in shops should be enumerated in the building where they sleep. Persons who are employed *out of doors*, such as persons fishing or watching their crops, and policemen on their beats, are to be treated as present in the houses where they live and take their meals.

4. Column 4 (Religion).—Ask the head of the family to which of the following religions, *viz.*, Hindu, Mussalman, Jain, Sikh, Christian, Parsi, Jew, Buddhist each of the persons shown in column 3 belongs, and enter the answer in this column. The answer given by each person should be accepted and entered here. A person returning himself as Jain or Sikh should be entered as Jain or Sikh though he may also add that he is a Hindu. Similarly Brahmos, Aryas and Devasamajis should be entered as such. In the case of Christians the sect should be entered alongside. Vague entries like "protestant" should be avoided and the exact denomination given. In the case of aboriginal tribes and others who do not belong to any of the foregoing religions, enter the name of the tribe, etc., which they return, *e. g.*, Soliga, Korama, etc. A list of the principal religions and sects commonly returned is given in Appendix III. Where two or more persons belong to the same religion, do not write "Ditto" in this column; repeat the name of the religion against each such person.

5. Column 5. (Sex).—Here enter the sex of each person, as male (M) or female (F) as the case may be. It is not necessary to write the full word. Write the initial letter M or F. Eunuchs and Hermaphrodites are to be entered as males. An entry should be made in this column even in cases in which for want of name the person has been described as "woman" in column 3.

6. Column 6. (Civil Condition).—Enquire if the person in column 3 is married or not married or is a widower or widow, and enter the answer. Write "Yes" for married persons, "No" for unmarried persons and for "widower" or "widow" write the initial letter "W".

Enter prostitutes ordinarily as unmarried (No.), but if any of them return themselves as married enter Yes. Persons who are recognised by custom as married are to be entered as married (Yes) though they may not have gone through the full ceremony, as for example a "Kudike" wife. Divorced persons who have not remarried should be entered as widowed.

7. Column 7. (Age).—Enter the number of years to nearest birthday or the nearest age in years known. For infants less than six months old, enter O; and for infants over six months enter 1.

If a person cannot state his or her age exactly, ask the relations, or refer to some well-known event of local importance or if the person be present, guess age from appearance. Do not leave the column blank.

8. Column 8 (a) and (b).—(Caste and sub-caste). Enter caste as ordinarily understood. For wide castes enter sub-caste also. The class titles, Brahmin, Kshatriya, Vaishya and Sudra are usually insufficient by themselves. For non-Indian subjects of the Empire and for foreigners enter race, as "Anglo-Indian," "Canadian" "Goanese," "Turkish." Both the sub-columns (a) and (b) should be filled up for Hindus and Jains. For others, only sub-column (a) should be filled up and sub-column (b) left blank. Persons returning themselves as Kunchitiga should be entered as such and not as Vokkaliga. A list of the principal castes, tribes and races, etc., is given in Appendix IV.

For Hindus you should enter in sub-column (a) the caste as Nagartha, Lingayita, Vokkaliga, Kunchitiga, Visvakarma, Kuruba, Beda, Banajiga, Vodda, Adikarnataka, and so on. For Jains, ascertain whether Digambara, Svetambara or Sada or other caste or sect and enter in sub-column (b). For Mussalmans, who do not observe caste distinctions enter the tribe, etc., as Pathan, Moghul, Labbe, etc. For Christians, enter the *race* or *nationality* as English, Scotch, Irish, etc., in the case of *foreigners* and Indian for Indian Christians. Any other distinction which may be returned among *Indian Christians* may also be noted.

9. Column 9 (Worker or Dependent).—Enter "earner" or "dependent". Those who are in receipt of independent income from property which they possess in their own right (rent from houses, interest on investments, etc.,) should be shown as earners. So too should members of a joint-family property, who are engaged in work on the property and in producing the income from the property. Women and children will be shown as earners only if they are helping to augment the family income by permanent and regular work for which a return is obtained in cash or in kind. A woman who looks after her house and cooks the food is not an earner but a dependent. But a woman who collects and sells firewood or cowdung is thereby adding to the family income, and should be shown as an earner. So also a woman who regularly assists her husband in his work (e. g., the wife of a potter who fetches the clay from which he makes his pots,) but not one who merely renders a little occasional help. A boy who sometimes looks after his father's cattle is a dependent, but one who is a regular cowherd and earns pay as such in cash or in kind should be recorded as such in column 10. It may be assumed, as a rough and ready rule that boys and girls over the age of 10 who actually do field labour or tend cattle are adding to the income of their family. They should therefore be entered in column 10 or 11 according whether they earn pay or not. Boys at school or college should be entered as dependants. Dependants who assist in the work of the family and contribute to its support without actually earning wages should be shown as dependants in column 9 and under subsidiary occupation in column 11. Thus a woman who keeps house for her husband is a dependant and entered as such in column 9, but has the subsidiary occupation (to be entered in column 11) of house-keeping.

10. Column 10. (Principal occupation of actual workers.)—Enter the principal means of livelihood of all persons who actually do work or carry on business, whether personally or by means of servants or who live on houserent, pension, etc. Enter the exact occupation and avoid vague terms such as "service" or "writing" or "labour." For example in the case of service, distinguish Government Service, railway service, municipal service, village service, service in a shop or office, and domestic service, etc., also show the exact occupation followed, *e.g.*, in the case of Government service state whether Assistant Commissioner, or Officer in the Army, or Civil Court Clerk, or Police Inspector, etc. In the case of clerks the occupation of their employer must be shown, *e.g.*, lawyer's clerk. Persons living on agriculture must be distinguished as non-cultivating owners, cultivating owners, cultivating tenants (whether the rent is paid in kind or in cash) or agricultural labourers. Where a person cultivates part of his land and sublets part, he should be shown in column 10 as a cultivator and in column 11 as a landlord, if he gets the greater part of his income from the land which he cultivates himself, and *vice versa* otherwise. Gardeners and growers of special products such as *pan*, etc., must be described as such. Persons whose income is derived from the rent of houses or land in towns should be distinguished from those who derive it from agricultural land,

In the case of labour, say whether in the fields, or in a coal mine, or factory, or cotton mill or earthwork, etc. Where large gangs of coolies are employed on earth work of any kind, enter not only the word "earthwork," but also the nature of the undertaking in connection with which it is being done. If a person makes the articles he sells he should be entered as "maker and seller" of them. Women and children who work at any occupation which helps to augment the family income must be entered in column 9 and in column 11. For dependants make a cross into only in column 10.

11. Column 11. (Subsidiary occupation of actual workers).—Enter here any occupation which actual workers pursue at any time of the year in addition to their principal occupation Where a man has two occupations, the principal one is that on which he relies mainly for his support and from which he gets the major part of his income. Thus if a person lives principally by his earning as a boatman, but partly also by fishing, the word "boatman" will be entered in column 10, and "fisherman" in column 11. A subsidiary occupation need not be one followed throughout the year. One *followed at any time of the year* and bringing an income should be entered. If there are several subsidiary occupations the most important one should be entered. The others may be omitted.

In cases where a person with private means follows some occupation, that occupation should be entered in column 10 and the source of this private income in column 11. Replies such as are given to a Magistrate in court by a witness who is asked to state his profession are not enough.

If an actual worker has no additional occupation a cross (X) will be put. Dependants who help to support the family by subsidiary work, *e.g.*, a woman who is helping in the fields as well as doing house work will be shown in this column.

12. Column 12. (Industry in which employed).—Enter in this column only persons working in origanised industries. Thus a carpenter employed by a furniture manufactory will be entered "carpenter" in column 10 and "Furniture making" in column 12. A village carpenter working at home or a jobbing carpenter working for his own hand must not appear in column 12 at all. He appears only in column 10. Agricultural labourers should be entered in this column, only if they are employed in some special branch of agriculture or in other industry involving agriculture incidentally or if they are employed by some person or company practising agriculture on an extensive scale. In the former case the name of the particular industry will be entered, *e.g.*, "dairy farming," "horse-breeding"; in the latter the entry will be "Agriculture." For managers, clerks, operatives or workmen employed in a factory or by any person employing labour, fill up the name of the industry, *e.g*, biscuit-making, gold mining. For individual workers not employed by others, put a cross (X).

13. Column 13. (Birth-place).—For persons born in the State enter the district in which each person was born, thus Tumkur District, Kolar District. For persons not born in Mysore State add the name of the province or State to the district of birth, thus, "Bellary District, Madras Presidency;" "Amreli District, Baroda State." For persons born out of India, do not enter the name of a district but the country, thus China, Afghanistan, Ceylon, etc, The names of villages, taluks, etc., are not to be given. A list of the chief birth places returned at the last Census is given in Appendix V.

14. Column 14. (Mother tongue).—Enter the language which each person mentions as his mother language, *i.e.*, that which he ordinarily uses in conversation with his mother or other relations. The entry should be for the genuine mother tongue as first spoken from the cradle. In the case of infants and deaf mutes, the language of the mother should be entered. A list of the principal languages returned at the last Census is given in Appendix VI.

15. Column 15. (Subsidiary Language).—Enter the language or languages habitually spoken by each person in addition to his mother tongue in daily or domestic life.

16. Column 16. (Literate or illiterate) —A person is to be considered as literate in a language only if he can write a letter in that language and read the answer to it. If the person is literate in this sense in Hindi, write in this column Hindi; if he is literate in Urdu, write Urdu; if literate in any other language write "Yes." For illiterate persons write "No."

17. Column 17. (*a*) (English).—Enter Yes if the person can read and write English. Otherwise put X. (*b*) (Other languages in which literate.) Enquire if the person is literate in Kannada and any other languages and write down the languages in which he is literate as (1) Kannada, Telugu, or (2) Kannada: Tamil, or (3) Tamil, Marathi, etc.

18. Column 18. (Infirmities).—If any person be (1) blind of both eyes or (2) insane or (3) suffering from corrosive leprosy or (4) deaf *and* dumb, enter the name of the infirmity in the column. Do *not* enter those who are blind of one eye only or those suffering from white leprosy only.

19. Column 19. (Vaccination).—Ask about each person if he has been vaccinated and write Yes if vaccinated at least once and No if never vaccinated.

If you find a "dwelling house" without a number, report the fact to your Supervisor and proceed to make entries for it giving it a sub-number after the number of the preceding house. When entries for a house have to be continued on the next page, write the house number on that page also and add the word "continued."

Persons who are recognised by custom as married are to be entered as married (Yes) though they may not have gone through the full ceremony as for example a "Kudike" wife. Divorced persons who have not remarried should be entered as widowed.

8. Column 8. (a) and (b).—Caste and sub-caste. Enter caste as ordinarily understood. For wide castes enter sub-caste also. No. R. 3325—*L. R.* 15-26-8, *dated 4th December* 1930.

Under section 5 (2) of the Amended Minor Tank Restoration Regulation No. XV of 1923 the following Rules are hereby notified for general information.

1. A list of minor tanks that are to be restored each year should be prepared by the Revenue Department Talukwar. This list will be sent to the Executive Engineer for scrutiny and return by him.

2. The order in which the works should be taken should depend on the present condition of the tanks and whether they are in danger of getting irrepairably worse if not restored early. Whether their dangerous condition affects other tanks below should also be a factor to be considered in fixing the relative order in which the restoration is to be taken up. Tanks affecting railway lines and those for which the raiyats agree to pay contribution over and above the usual contribution of eight years' assessment, should receive preferential treatment.

3. As the Minor Tank Restoration Regulation, 1923 has fixed the procedure to be adopted for taking up the restoration of Minor tanks, the selection of tanks to be taken up in the coming year should be made by the Deputy Commissioner in consultation with the Executive Engineer. For this purpose, information should be got from the several Taluks by the Deputy Commissioner through the Sub-Division Officer after consulting local bodies. This should reach the Deputy Commissioner's office not later than the 30th September of each year.

4. The Deputy Commissioner should place the programme before the District Board who should consider it in a meeting to be held not later than October of the year when the Executive Engineer and the Sub-Division Officers will be invited to attend the meeting to explain any facts required by the Board. The resolution of the Board should be sent to the Deputy Commissioner not later than 15th November.

5. The Deputy Commissioner will then hold a meeting of the Revenue and Public Works Department Officers of the District about the last week of November and decide on the programme of works to be undertaken the next year.

6. A copy of the programme should be sent to the Executive Engineer before the 1st of December. The Executive Engineer will take steps to have estimates prepared for tanks included in the programme, unless estimates had been previously prepared with respect to any works therein included.

7. The Executive Engineer will then send the estimates as soon as they are ready, for sanction before the close of the official year.

8. The sanctioned works should be put in hand without delay and completed within two seasons. In cases where the works are not completed within two seasons, special reports should be submitted to Government by the Executive Engineer through the Superintending Engineer and the Chief Engineer explaining the circumstances which contributed to the delay in the completion of the works and the Executive Engineer will also furnish a copy to the Deputy Commissioner for information. These reports will be reviewed by Government.

9. When once a tank is restored and handed over to the Revenue Department, it should be the duty of the raiyats to keep it in good order, doing the usual maintenance work.

10. The Revenue and Public Works Officers will co-operate in the matter of carrying out repairs to tanks whenever found necessary and the execution of maintenance work where the raiyats have failed to do their duty.

NOTE.—The above rules are only supplementary to the rules already in force and contained in the Revenue Manual in respect of the restoration and maintenance of tanks.

OFFICE OF THE COMPILER, *MYSORE GAZETTE.*

NOTICE.

1. The *Mysore Gazette* is published at Bangalore every Thursday. Matter for publication in the Gazette is often sent late to the Press. This involves considerable inconvenience to the Press and expense to Government. All matter intended for publication in Parts I, III, IV, V and VI should therefore reach this office not later than **Monday evening**, and that for Part II not later than **Tuesday evening**, for the following Thursday's issue of the Gazette. 2. Spare copies of notifications, etc., are often asked for long after their publication, when the matter has been broken up, necessitating its resetting and thereby causing inconvenience to the Press and waste of money. When spare copies are wanted, a note to that effect, stating the number of copies, should be made at foot of such manuscript.

3. Matter sent for insertion in the Gazette will be published *only once* and the abstract in two issues. (G. O. No. G. 2915-6—P. & S. 44-25-2, dated 13th September 1926).

6. As Government Treasuries in Mysore are authorized to receive and credit Gazette subscriptions as well as publication charges remitted by Courts or private parties, all such moneys should be sent to Treasuries and only Treasury receipts forwarded to this office. No money orders or cash will be received by the undersigned except from parties outside the State.

7. Much inconvenience is caused to this office by subscribers omitting to give their full and correct addresses and writing illegibly on the money order coupons. They are requested to insert invariably the name of the Post Office to which their copy should be sent.

8. Communications on post cards or on paper less than quarter sheet of foolscap, will not receive attention; and no communication should be sent on Government Service by private parties.

9. An efficient system of check and counter-check is maintained over the despatch of Gazette copies forwarded through post. Duplicates cannot be supplied in any case of non-delivery.

lorries and the sale of 35 old bullocks of the Transport Corps. Subsequently, sanction was accorded to the purchase of two more lorries with a view to effect progressive reduction in the animal transport in the Corps as well as in the personnel in charge of it. As a net result of these orders, a saving of Rs. 14,136 is expected under Establishment and Rs. 19,332 under other charges in the first stage and a further saving of Rs. 8,340 under Establishment and Rs. 3,012 under other charges in the second stage. As vehicles drawn by horses are fast falling into disuse by the advent of the motor car, the Government Stables were abolished and the number of motor cars maintained at the Government House was increased in consequence.

4 The scheme of boarding out horses to officers of the Mysore Government and private gentlemen which was sanctioned in November 1921 but was abolished in September 1923 owing to shortage of horses in the Regiments was revived during the year with certain modifications. Three horses from the Mysore Lancers and one from the Mysore Horse were hired out to civil officers according to this scheme during the year.

5. With a view to improve the general level of education of the men belonging to the various units of the Mysore State Troops, a scheme of educational training was sanctioned during the year and an officer of the Indian Army Educational Corps was appointed as Instructor for a period of two years with the rank and status of a Jamedar. The school had on its roll 100 men of all ranks including recruits who are receiving instruction in Roman, Urdu, Arithmetic, Map-reading, Compass-reading, measuring of angle, etc., which are essential for an army in the field. All ranks are reported to be evincing much interest in the training and the results achieved are reported to be encouraging. A cadre of 15 literate non-commissioned officers and sowars is reported to have been given instruction in teaching methods so that they may in due course take up the work of the Educational Instructor.

6. A court-martial was held during the year for the trial of 3 sowars of the Mysore Lancers charged with affray and all of them were convicted. The discipline in all Units was satisfactory.

7. The officers and men of the Mysore Lancers who took part in rifle meetings and military sports both within and outside the State secured the topmost places and carried off several prizes, medals and cups. Prizes were also won by the horses of this Regiment which entered for some of the events in the Bangalore Hunt Horse Show and the local Gymkhana Races.

8. There was more than one occasion when the civil authorities had to call in the aid of the Military during the year for the quelling of disturbances due to labour or communal troubles and strikes. A detachment of the Mysore Lancers under a Ressaldar was detailed for duty in July 1929 in connection with the Moharram disturbances at Davangere and two squadrons of the same Unit were detailed in April 1930 to maintain order in the Kolar Gold Fields area in connection with the labour troubles that broke out there. Parties of mounted and dismounted men were detailed in June, July and August 1929 in connection with the Mill strikes at Bangalore City. The troops acquitted themselves satisfactorily on all these occasions and were of great help in restoring order. Rules were issued during the year to regulate the detailing of military forces in aid of civil power on the model of those in force in the Indian Army.

9. The total expenditure under the head "Army" during the year was Rs. 18,23,007 as against Rs. 19,33,842 during the previous year. The total amount spent on military works both original and repair—was Rs. 1,03,125 as against Rs. 1,57,956 in the previous year. Of this, the outlay incurred on the construction of quarters for officers and sowars was only Rs. 36,030. It was not possible to take up many urgent works for want of funds.

10. The Technical Adviser for signalling and for Musketry who inspected the Mysore Lancers during the year expressed satisfaction at the efficient training of the Unit in both these branches. The Military Adviser has in his annual inspection of the Regiment also acknowledged the general efficiency of the Unit in respect of drill, signalling and musketry.
